SELF-ASSESSMENT OVERVIEW & INSTRUCTIONS

This self-assessment is intended to help guide you in your own professional development. It's important to look inward and be honest with yourself in order to accurately identify areas of strengths and opportunities. Your responses will not be considered toward your yearly Goal Plan ratings but will serve to assist you and your manager in creating a development plan best suited for your goals.

To begin, review the definition of each competency and the key characteristics carefully. Select the self-rating response from the drop-down that reflects your current practices. Once you have completed the entire self-assessment, select one to two individual competencies you would like to focus on for further development. In order to help track your progress, you can add your plan in Dayforce under, Performance → Development Plans.

Devry University Assessment Preparation Test:

Conflicting Stakeholders in Higher Education Assessment H. Russell Searight, 2024-08-28 Assessment requirements in universities have become nearly universal Evaluation efforts typically focus on documenting student and program learning outcomes Despite being framed as tools for enhancing educational quality decades of assessment efforts suggest that this goal is not being met This critique is contextualized within broader social historical shifts in higher education pointing out how assessment practices have paralleled trends toward corporatization and heightened administrative oversight Many assessment professionals adopted methodologies from behavioural science and educational measurement while neglecting essential measurement principles resulting in data quality issues Existing assessment measures often exhibit questionable reliability and validity undermining their effectiveness This book suggests that the prevalent summative approach to course objectives may not be the best method for improving instruction or assessing student learning Alternatives such as research derived from the Scholarship of Teaching and Learning and qualitative formative assessments may yield more meaningful quality driven information **HealthCare.gov** United States.
