

Auto Repeat Playback

12 For time-activated recording, set the recording level to suit the selected signal. For time-activated playback, set the source switch to the desired mode.

13 For time-activated recording, set the deck's "Time" switch to "Rec". For time-activated playback, set the switch to "Play".

14 For the time to the desired operation time, set the time to the desired value. The time will automatically advance to the components, and recording or playback will start automatically.

Notes

- Be sure to set the deck's "Time" switch to "Rec" when time recording or playback is not to be carried out.
- If the repeat playback rate of the recorded materials are reversed, time-activated recording is not possible and the deck will go into the stop mode.

(1) Auto Repeat of One Complete Side

With the Auto Repeat switch set to "CR", the following operating sequence is repeated after the tape end is reached during recording, playback or fast forward: automatically rewind to the tape start — playback from the beginning — automatically rewind when tape end is reached — playback from the beginning.

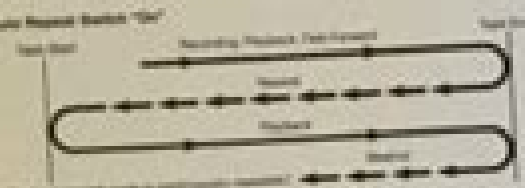

Repeat playback will also be performed if the beginning of the tape is reached in record.

(2) Auto Repeat Between Tape Counter "0000" and Tape End

The auto-repeat function can also be used in conjunction with the Memory switch. When the Auto Repeat switch and the Memory switch are both set to "CR", auto repeat will be performed between the tape counter "0000" indication and the tape end.

- When the Time switch is set to "Rec" or "Play", the auto-repeat function is inoperative.

• Auto Repeat Switch "CR"

With the Memory switch set to "CR", the playback repeat cycle is repeated between tape counter "0000" indication and the tape end.

Maintenance

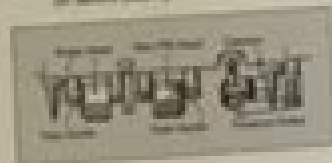

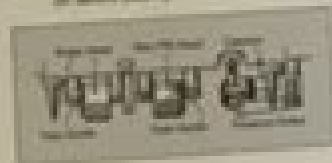

Cleaning

It is very important to regularly clean the head surfaces and transport sections. An accumulation of dust on the particles released from the tape onto head parts can become the cause of drop-outs and generally degrade high frequency response and stereo and other characteristics. Regular cleaning is advised.

- 1) Remove the cassette holder cover and clean the cassette holder head.

- 2) Press the Play button and clean the recording/playback head by holding a cotton swab with light pressure against the color on the side facing away from the cassette.

Demagnetizing

After a longer period of use, there may be a build-up of residual magnetism in the heads and cassette. Such residual magnetism can cause noise and possibly cause the high frequencies of a tape being played. To prevent this, you should demagnetize these parts about once every 20 hours of use with the tapeholder set to demagnetize (optional) or any other properly designed demagnetizer. For details, refer to the instruction manual of the demagnetizer.

Lubrication

An important moving parts that cassette deck are those with tiny pins, oil and bearings. Periodic lubrication is therefore not recommended.

Cleaning the Receptacle

Clean the receptacle only by using it with a soft dry cloth. Never use alcohol, solvents, abrasive or abrasive-cleaning agents.
