and timely contribution to the question of vulnerability in police custody It addresses the implementation of the appropriate adult safeguard in respect of adult suspects and explores police decision making in this context Drawing on empirical research carried out in England the work takes a socio legal approach to examine how and why police custody officers implement or not the appropriate adult safeguard The book s core arguments are addressed within three parts Part I examines how vulnerability is constructed philosophically and practically firstly within the broader literature thereafter at common law and in statute and finally by police custody officers Part 2 discusses how vulnerability is identified and how decisions are made in response to vulnerability Part 3 critically assesses the theoretical understandings of police decision making and criminal justice Here it is argued that current theories on police decision making hold explanatory power yet have significant shortcomings in relation to vulnerability and the appropriate adult safeguard The book thus presents new theoretical insights and on the basis of these insights asserts that the current regime of regulation must be reconsidered while police compliance may only be ensured if vulnerability is radically reconceptualised
