the Management of Crew Endurance Risk Factors ,2001 A ship s endurance depends on how long it can support operations at sea without replenishing supplies or requiring in port maintenance Similarly crew endurance can be described as a function of physiological and psychological factors that support crew members ability to perform their jobs effectively Recent studies of Coast Guard personnel on cutters at small boat stations and at air stations have shown that some of our traditional work practices can lead to poor endurance which translates to poor readiness This Guide will show you how to manage crew endurance It explains the different endurance risk factors and takes you step by step through the process of identifying these risks at your unit and implementing the controls necessary to improve crew endurance and mission effectiveness These practical methods have been tested and proven on Coast Guard cutters at Coast Guard air stations at small boat stations and on commercial vessels **Government Can Deliver: A Practitioner's Guide to Improving**
