

Project Submission Guidelines

Following are the project deliverables

1. One Page Report (Word/ PDF)
2. Project Source Code via GitHub
3. Data Analytics Implementation
4. Hosting via Online Platforms (e.g., Google Firebase, Vercel)
5. 3 to 5 Minute Project Video

Project submission deadline: End of Week 13

Use of AI: GenAI is a valuable tool that can aid in advancing software development. However, excessive reliance on AI tools may hinder the learning experience. Students are permitted to use AI for boilerplate code generation, such as templates, basic functionality, or overall structure. However, they must ensure they fully understand the code and be able to explain its purpose and implementation.

Project Timeline: The project implementation (coding part) is achievable within 8 to 12 days. The remaining components, including the report and video, should be completed within 5 to 7 days. In total, the project would take no more than 3 weeks. If the project takes longer, it may indicate that some aspects need to be reassessed. However, if any group feels they are struggling to meet the deadline, they can reach out to me and discuss an adjusted timeline.

Analytics Integration: Apart from the project functionality, each project must integrate analytics to collect and analyze user data. Details are given in this document.

Frameworks and technologies: Technologies mentioned in each project are a minimum requirement of the use of technologies. If students desire, they can use advanced frameworks and technologies like React, Vue, Next.js etc. There is no restriction on the use of any technology as far as it reaches the minimum requirements mentioned in each project.
