Cognitive Processes And Economic Behaviour:

Cognitive Processes and Economic Behaviour Marcello Basili, Nicola Dimitri, ITZHAK GILBOA, 2012-12-06 In recent years the understanding of the cognitive foundations of economic behavior has become increasingly important This volume contains contributions from such leading scholars as Adam Brandenburger Michael Bacharach and Patrick Suppes It will be of great interest to academics and researchers involved in the field of economics and psychology as well as those interested in political economy more generally *Personality and Cognition in Economic Decision Making* Aurora

García-Gallego, Manuel I. Ibáñez, Nikolaos Georgantzis, 2017-08-22 Psychologists studying cognitive processes and personality have increasingly benefited from the wealth of theory methodology and decision making paradigms used in economics and game theory Similarly for the economists personality traits and basic cognitive processes offer a set of coherent explanatory constructs in economic behavior Given the debate on preference invariance and behavioral consistency across contexts and domains the papers in this topic shed light on the existence and effect of stable sets of idiosyncratic features on economic decision making While the effects of personality and cognition on economic decisions remain under explored the papers contributed in this topic offer more than a stimulus for further research The general message could be that personality and cognitive processes offer the stable idiosyncratic ground on which individual decisions are made **Behavioral Economics**

and Smart Decision-Making Ankal Ahluwalia, 2025-01-03 The illustrations in this book are created by Team Educohack Behavioral Economics and Smart Decision Making explores the modern approach to economics emphasizing the impact of psychology and human behavior We delve into various theories within this field including Prospect Theory measurement principles and heuristics and biases Our book also discusses how behavioral management modernizes traditional management practices Designed to enhance understanding this book is an essential resource for anyone interested in the intersection of economics and psychology Routledge Handbook of Behavioral Economics Roger Frantz, Shu-Heng

Chen, Kurt Dopfer, Floris Heukelom, Shabnam Mousavi, 2016-08-05 There is no doubt that behavioral economics is becoming a dominant lens through which we think about economics Behavioral economics is not a single school of thought but representative of a range of approaches and uniquely this volume presents an overview of them The wide spectrum of international contributors each provides an exploration of a central approach aspect or topic in behavioral economics Taken together the whole volume provides a comprehensive overview of the subject which considers both key developments and future possibilities Part One presents several different approaches to behavioural economics including George Katona Ken Boulding Harvey Leibenstein Vernon Smith Herbert Simon Gerd Gigerenzer Daniel Kahneman and Richard Thaler This section looks at the origins and development of behavioral economics and compares and contrasts the work of these scholars who have been so influential in making this area so prominent Part Two presents applications of behavioural economics including nudging heuristics emotions and morality behavioural political economy education and economic innovation The

Social and Economic Factors in Decision Making under Uncertainty Kinga Posadzy, 2017-11-16

The objective of this thesis is to improve the understanding of human behavior that goes beyond monetary rewards. In particular, it investigates social influences in individual's decision making in situations that involve coordination, competition, and deciding for others. Further, it compares how monetary and social outcomes are perceived. The common theme of all studies is uncertainty. The first four essays study individual decisions that have uncertain consequences, be it due to the actions of others or chance. The last essay, in turn, uses the advances in research on decision making under uncertainty to predict behavior in riskless choices.

The first essay, *Fairness Versus Efficiency: How Procedural Fairness Concerns Affect Coordination*, investigates whether preferences for fair rules undermine the efficiency of coordination mechanisms that put some individuals at a disadvantage. The results from a laboratory experiment show that the existence of coordination mechanisms such as action recommendations increases efficiency even if one party is strongly disadvantaged by the mechanism. Further, it is demonstrated that while individuals' behavior does not depend on the fairness of the coordination mechanism, their beliefs about people's behavior do.

The second essay, *Dishonesty and Competition*, provides evidence from a stiff competition environment exploring whether and how the possibility to behave dishonestly affects the willingness to compete and who the winner is in a competition between similarly skilled individuals. We do not find differences in competition entry between competitions in which dishonesty is possible and in which it is not. However, we find that due to the heterogeneity in propensity to behave dishonestly, around 20% of winners are not the best performing individuals. This implies that the efficient allocation of resources cannot be ensured in a stiff competition in which behavior is unmonitored.

The third essay, *Tracing Risky Decision Making for Oneself and Others: The Role of Intuition and Deliberation*, explores how individuals make choices under risk for themselves and on behalf of other people. The findings demonstrate that while there are no differences in preferences for taking risks when deciding for oneself and for others, individuals have greater decision error when choosing for other individuals. The differences in the decision error can be partly attributed to the differences in information processing: individuals employ more deliberative cognitive processing when deciding for themselves than when deciding for others. Conducting more information processing when deciding for others is related to the reduction in decision error.

The fourth essay, *The Effect of Decision Fatigue on Surgeons' Clinical Decision Making*, investigates how mental depletion caused by a long session of decision making affects a surgeon's decision to operate. Exploiting a natural experiment, we find that surgeons are less likely to schedule an operation for patients who have an appointment late during the work shift than for patients who have an appointment at the beginning of the work shift. Understanding how the quality of medical decisions depends on when the patient is seen is important for achieving both efficiency and fairness in health care where long shifts are popular.

The fifth essay, *Preferences for Outcome Editing in*

Monetary and Social Contexts compares whether individuals use the same rules for mental representation of monetary outcomes e.g. purchases expenses as for social outcomes e.g. having nice time with friends Outcome editing is an operation in mental accounting that determines whether individuals prefer to first combine multiple outcomes before their evaluation integration or evaluate each outcome separately segregation I find that the majority of individuals express different preferences for outcome editing in the monetary context than in the social context Further while the results on the editing of monetary outcomes are consistent with theoretical predictions no existing model can explain the editing of social outcomes

Journal of Economic Behavior & Organization ,1994 *Science as Cognitive Process* Robert A. Rubinstein, Charles D. Laughlin, John McManus, 1984 **Psychology And The Economic Mind** Robert L Leahy,

PhD, 2002-10-21 This book elaborates on a multidimensional model of decision making that applies to how individuals make mundane decisions Decisions about pursuing relationships exercise work or anything where people might have to invest time or behavioral effort are examples The author utilizes cognitive developmental theory to understand how children and adolescents make sense of economic inequality This modern portfolio theory model of decision making applies economic concepts to everyday life and may help us understand why individuals differ in their willingness to take risks It also contributes to our knowledge of personality disorders such as depression and mania For Further Information Please Click Here

A Framework for Cognitive Economics Roger McCain, 1992-08-21 This is the first book length work to integrate the insights of cognitive science fully into economics It reviews a wide range of related work in both fields and proposes new approaches to choice theory rationality and interaction equilibrium that are consistent with the limited cognitive capacity of real human beings While joining with neoclassical economics in supporting the validity of supply and demand theory where it is literally applicable McCain challenges most neoclassical theory especially monopoly oligopoly and general equilibrium theory and welfare economics His work aims to further and unite recent notions of behavioral and social economics This important work will be of interest to behavioral social and Keynesian economists as well as other social scientists and philosophers interested in economic phenomena *Economics As a Science of Human Behaviour* Bruno S. Frey, 1992-05-31

This book champions the view that economics is a social science and that moreover it may serve as a new paradigm for the social sciences Economics is taken to be part of those sciences which deal with actual problems of society by providing insights improving our understanding and suggesting solutions I am aware that the way problems are addressed here has little in common with economics as it is generally understood today most economists make strong efforts to imitate the exact sciences Economics tends to become a branch of applied mathematics the majority of all publications in professional journals and books are full of axioms lemmas and proofs and they are much concerned with purely formal deductions Often when the results are translated into verbal language or when they are applied empirically disappointingly little of interest remains The

book wants to show that another type of economics exists which is surprisingly little known This type of economics has its own particular point of view It centres on a concept of man or a model of human behaviour which differs from those normally used in other social sciences such as sociology political science law or psychology I do not however claim that economics is the only legitimate social science On the vii viii PREFACE contrary economics can provide useful insights only in collaboration with the other social sciences an aspect which has been disregarded by mathematically oriented economics

The Cognitive Basis of Institutions Shinji Teraji, 2018-02-16 The Cognitive Basis of Institutions A Synthesis of Behavioral and Institutional Economics synthesizes modern research in behavioral economics with traditional institutional economics This work emphasizes that institution and agent are inextricably linked and that both cognitive and institutional processes coalesce to influence human decision making It integrates cognition and institution through the behavioral economics theoretical lens of bounded rationality Methodologically it develops game theoretical complexity and neuroeconomic solutions to unite study of the two areas The work concludes by proposing general implications for the economic study of decisions using the cognitive institutional approach also providing specific recommendations for public policy Reveals how institutional structures and individual actions interact and coevolve cognitively Connects individual decision making decision making processes and institutional formation Unites our understanding of cooperative prosocial behavior with the institutional dynamics that may create it Discusses the implications of the behavioral institutional paradigm for paternalism and libertarianism in public policy
