Analytics Accelerator Version 2.1 for IBM z/OS also called DB2 Analytics Accelerator or Query Accelerator in this book and in DB2 for z/OS documentation is a marriage of the IBM System z Quality of Service and Netezza technology to accelerate complex queries in a DB2 for z/OS highly secure and available environment. Superior performance and scalability with rapid appliance deployment provide an ideal solution for complex analysis. This IBM Redbooks publication provides technical decision makers with a broad understanding of the IBM DB2 Analytics Accelerator architecture and its exploitation by documenting the steps for the installation of this solution in an existing DB2 10 for z/OS environment. In this book we define a business analytics scenario, evaluate the potential benefits of the DB2 Analytics Accelerator appliance, describe the installation and integration steps with the DB2 environment, evaluate performance and show the advantages to existing business intelligence processes.

The Art of Enterprise Information Architecture Mario Godinez, Eberhard Hechler, Klaus Koenig, Steve Lockwood, Martin Oberhofer, Michael Schroeck, 2010-04-01. Architecture for the Intelligent Enterprise. Powerful New Ways to Maximize the Real-time Value of Information. Tomorrow's winning Intelligent Enterprises will bring together far more diverse sources of data, analyze it in more powerful ways, and deliver immediate insight to decision makers throughout the organization. Today, however, most companies fail to apply the information they already have while struggling with the complexity and costs of their existing information environments. In this book, a team of IBM's leading information management experts guide you on a journey that will take you from where you are today toward becoming an Intelligent Enterprise. Drawing on their extensive experience working with enterprise clients, the authors present a new information-centric approach to architecture and powerful new models that will benefit any organization. Using these strategies and models, companies can systematically unlock the business value of information by delivering actionable real-time information in context to enable better decision making throughout the enterprise, from the shop floor to the top floor. Coverage includes: Highlighting the importance of Dynamic Warehousing; Defining your Enterprise Information Architecture from conceptual, logical, component, and operational views; Using information architecture principles to integrate and rationalize your IT investments; from Cloud Computing to Information Service Lifecycle Management; Applying enterprise Master Data Management (MDM) to bolster business functions ranging from compliance and risk management to marketing and product management; Implementing more effective business intelligence and business performance optimization governance and security systems and processes; Understanding Information as a Service; and Info 2.0: the information delivery side of Web 2.0.
