SETTING THE STAGE During World War II, the United States and the Soviet Union had joined forces to fight against the Germans. The Soviet army marched west; the Americans marched east. When the Allied soldiers met at the Elbe River in Germany in 1945, they embraced each other warmly because they had defeated the Nazis. Their leaders, however, regarded each other much more coolly. This animosity caused by competing political philosophies would lead to a nearly half-century of conflict called the Cold War.

C. Pauly,2025-08-15 The Art of Coercion presents a fresh explanation for the success and failure of coercive demands in international politics Strong states are surprisingly bad at coercion History shows they prevail only a third of the time Reid B C Pauly argues that coercion often fails because targets fear punishment even if they comply In this damned if you do damned if you don t scenario targets have little reason to obey Pauly illustrates this logic in nuclear counterproliferation efforts with South Africa Iraq Libya and Iran He shows that coercers face an assurance dilemma When threats are more credible assurances not to punish are less so But without credible assurances targets may defy threats bracing for seemingly inevitable punishment For coercion to work as such coercers must not only make targets believe that they will be punished if they do not comply but also that they will not be if they do Packed with insights for any foreign policy challenge involving coercive strategies The Art of Coercion crucially corrects assumptions that tougher threats alone achieve results *Bulletin of the Atomic Scientists* ,1993-11 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Bulletin of the Atomic Scientists** ,1991-11 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world
