- Option BLIndépendante pour communications de données haut débit (19K2)
- Garantie de 3 ans
- Distribution & prise en charge mondiale

L'émetteur-récepteur NGT™ SRx a été conçu spécialement pour fournir des solutions de communications haute fréquence (HF) complètes et avancées. Il est rentable et peut répondre à vos exigences en matière de communications HF mobiles et de poste de base tant par son fonctionnement vocal que de données.

Tout en incorporant les fonctionnalités habituelles de la technologie radio HF à la pointe du progrès et la fiabilité réputée de Codan, le NGT™ SRx a été construit pour être 'la' solution radio qui convient à toutes les conditions et toutes les configurations.

La convivialité de l'interface du combiné Codan et sa capacité d'autotest rendent le NGT™ SRx plus facile à installer, à exploiter et à maintenir que d'autres émetteurs-récepteurs. Il a aussi été conçu entièrement interopérable avec les autres émetteurs-récepteurs HF pour fournir une intégration de réseau HF transparente.

FACILE A UTILISER

Le NGT™ SRx de Codan est conçu pour être déployé rapidement dans les configurations de base et mobiles. L'équipement de montage et les interfaces de câbles volant conçus spécialement, permettent au NGT™ SRx d'être installé rapidement et dans un minimum d'espace tout en fournissant un accès aisé pour les besoins d'entretien.

Le combiné peut être monté en tout lieu qui permette de le voir et d'y accéder facilement ; il s'agit d'un point important, surtout dans un véhicule où l'espace est limité. Grâce à l'interface conviviale complète et au contrôle intégral du combiné, tout conducteur ou passager peut exploiter l'émetteur-récepteur, où qu'il soit situé à l'intérieur du véhicule.

Des droits d'accès protégés par mot de passe programmable peuvent être utilisés pour personnaliser l'ensemble des fonctionnalités et des capacités de l'émetteur-récepteur aux exigences spécifiques de l'utilisateur afin que l'opérateur ne se heurte pas à une complexité inutile.

La capacité des nombreux appareils de contrôle incorporés (Built-In Test Equipment ou BiTE) facilite la tâche des utilisateurs ou administrateurs de réseaux en matière d'analyse de performance de l'émetteur-récepteur.

La sortie d'antenne de 50 ohms est entièrement protégée contre tous les états de charge y compris court-circuit, circuits ouverts et rapport de tension des ondes stationnaires (VSWR), capables de détruire d'autres émetteurs-récepteurs. En cas de mauvais VSWR, un rapport d'erreur est transmis au combiné. Le VSWR peut aussi être vérifié dans le combiné à tout moment.
