Innovative Computing Technology Pit Pichappan,Hojat Ahmadi,Ezendu Ariwa,2011-12-08 This book constitutes the proceedings of the First International Conference on Innovative Computing Technology INCT 2011 held in Tehran Iran in December 2011 The 40 revised papers included in this book were carefully reviewed and selected from 121 submissions The contributions are organized in topical sections on software Web services and service architecture computational intelligence data modeling multimedia and image segmentation natural language processing networks cluster computing and discrete systems *The 8th International Conference on Robotic, Vision, Signal Processing & Power Applications* Harsa Amylia Mat Sakim,Mohd Tafir Mustaffa,2014-07-08 The proceeding is a collection of research papers presented at the 8th International Conference on Robotics Vision Signal Processing and Power Applications ROVISP 2013 by researchers scientists engineers academicians as well as industrial professionals from all around the globe The topics of interest are as follows but are not limited to Robotics Control Mechatronics and Automation Vision Image and Signal Processing Artificial Intelligence and Computer Applications Electronic Design and Applications Telecommunication Systems and Applications Power System and Industrial Applications *Proceedings of the Multi-Conference 2011* Himanshu B. Soni,Apurva Shah,2011-06-06 The International Conference on Signals Systems and Automation ICSSA 2011 aims to spread awareness in the research and academic community regarding cutting edge technological advancements revolutionizing the world The main emphasis of this conference is on dissemination of information experience and research results on the current topics of interest through in depth discussions and participation of researchers from all over the world The objective is to provide a platform to scientists research scholars and industrialists for interacting and exchanging ideas in a number of research areas This will facilitate communication among researchers in different fields of Electronics and Communication Engineering The International Conference on Intelligent System and Data Processing ICISD 2011 is organized to address various issues that will foster the creation of intelligent solutions in the future The primary goal of the conference is to bring together worldwide leading researchers developers practitioners and educators interested in advancing the state of the art in computational intelligence and data processing for exchanging knowledge that encompasses a broad range of disciplines among various distinct communities Another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working in India and abroad **Speech and Audio Processing** Ian McLoughlin,2016-07-21 An accessible introduction to speech and audio processing with numerous practical illustrations exercises and hands on MATLAB examples *A Practical Guide to Error-control Coding Using MATLAB* Yuan Jiang,2010 Offers engineers with a comprehensive understanding of error control coding an essential and widely applied area in modern digital communications This book includes such codes as block Reed Solomon convolutional turbo and LDPC codes **Programming in MATLAB** Patel,Mittal,2014 MATLAB provides an interactive programming interface for numerical

computation and data visualization making it the default framework used for analysis design and research in many domains of science and industry Programming in MATLAB A problem solving approach is intended as an aid to engineers and scientists with no prior programming expertise The book focuses on the systematic development of practical programming skills through MATLAB language constructs backed by several well designed examples and exercises Designed to be as much a MATLAB reference tool for researchers in varied fields as it is a guide for undergraduate readers the book builds on the concepts sequentially as it progresses through the chapters Each chapter is complete independent of the book s remaining contents Thus for teaching purposes one can suitably the relevant portions **MATLAB Implementation of the Steganographic Algorithm F5** Wassim Al Chamaa,2019-05-07 Project Report from the year 2018 in the subject Computer Science Programming language English abstract The F5 algorithm proposed by Westfeld is still one of the most known algorithms in the field of DCT based steganography It can make a JPEG image a container of a secret message where no one knows the presence of the message except the sender and the intended receiver In this programming work we show how to realize the F5 algorithm via Matlab We present the block diagrams of embedding and extracting processes and the entire Matlab code of the F5 algorithm Some Notes about the F5 Matlab code 1 The implementation code works according to the method proposed by Andreas Westfield in his paper F5 A Steganographic Algorithm High Capacity Despite Better Steganalysis Huffman coding and decoding are implemented using the Matlab JPEG Toolbox developed by Phil Sallee 2 The two part Matlab code included in the report embedding and extracting parts can be executed in Matlab IDE The embedding part reads the cover JPEG file and the message file we want to hide then it creates a Stego JPEG file according to the F5 algorithm On the other side The extracting part reads the Stego JPEG file and then it extracts the hidden message file 3 The F5 code calls the main two functions of Phil Sallee s Matlab Toolbox JPEG reading and writing These functions make it easier to access and manipulate the quantized DCT coefficients of a given JPEG file Using Sallee s Toolbox should accord with the used operating system whether it is 32 or 64 bits 4 The F5 code contains the function to form the image matrix to show the input and output images Running this function requires ALL the Sallee s Toolbox to be installed Otherwise the user can REMOVE this function from the code since it doesn t affect the main F5 process and thus keep ONLY using the main two function of the Sallee s Toolbox 5 The message file we want to hide can be any file of any kind and whatever its extension The size of the message file should be appropriate for the size of the used cover JPEG image so no errors will occur when executed **An Introduction to Programming and Numerical Methods in MATLAB** Stephen Robert Otto,2005 **A Tool for the Generation of Naturally Parallel Matlab Code** Solomon F. Gibbs,2005 **Learn matrix code simulation with MATLAB by Md. Al-Amin & Imam Hasan Al-Amin** Md. Al-Amin,Imam Hasan Al-Amin,Abu Baseem As Safwan,Mahamudul Hasan,MD.
