Evaluation & Management

The following codes, medium descriptors, and abbreviated guidelines are a subset of the AMA's Current Procedural Terminology (CPT®) code set. For unabridged code descriptors and complete guidelines, please refer to the CPT 2023 codebook or data file.

EVALUATION AND MANAGEMENT (E/M)

Evaluation and Management (E/M) Services Guidelines
The E/M function is divided into broad categories such as office visits, hospital visits, and consultations. Most of the categories are further divided into two or more subcategories of E/M services. For example, there are two subcategories of office visits (new patient and established patient) and there are two subcategories of hospital visits (initial and subsequent). The subcategories of E/M services are further classified into levels of E/M services that are identified by specific codes. This classification is important because the nature of work varies by type of service, place of service, and the patient's status.

Solely for the purposes of distinguishing between new and established patients, **professional services** are those face-to-face services rendered by physicians and other qualified health-care professionals who may report evaluation and management services reported by a specific CPT code(s). A **new patient** is one who has not received any professional services from the physician/qualified health-care professional or another physician/qualified health-care professional of the **exact same specialty and subspecialty** who belongs to the same group practice, within the past three years.

An **established patient** is one who has received professional services from the physician/qualified health-care professional or another physician/qualified health-care professional of the **exact same specialty and subspecialty** who belongs to the same group practice, within the past three years.

In the instance where a physician/qualified health-care professional is on-call for or covering for another physician/qualified health-care professional, the patient's encounter will be classified as it would have been by the physician/qualified health-care professional who is not available. When advanced practice nurses and physician assistants are working with physicians they are considered as working in the exact same specialty and exact same subspecialty as the physician.

Concurrent care is the provision of similar services (eg, hospital visit(s)) to the same patient by more than one physician or other qualified health-care professional on the same day. When concurrent care is provided, no special reporting is required. Transfer of care is the process whereby a physician or other qualified health-care professional who is providing management for some or all of a patient's problems relinquishes this responsibility to another physician or other qualified health-care professional who explicitly agrees to accept this responsibility and who, from the initial encounter, is not providing consultation services. The physician or other qualified health-care professional transferring care is then no longer providing care for these problems through or after may continue providing care for other conditions when appropriate. Consultation codes should not be reported by the physician or other qualified health-care professional who has agreed to accept transfer of care before an initial evaluation but are appropriate to report if the decision to accept transfer of care cannot be made until after the initial consultation evaluation, regardless of site of service.
