musical and creative growth through music composition while they are organized in logical units corresponding to existing teaching modules they also offer jumping off points for music teachers to exercise their own creative thinking and create music composition activities that are customized to their classes and needs As a whole Music Outside the Lines both successfully reasons that music composition should be at the core of school music curriculum and also provides inservice and pre service educators with an essential resource and compendium of practical tips and plans for fulfilling this goal

Bibliographic Index ,2007 Neurosciences in Music Pedagogy Francis Rauscher,Wilfried Gruhn,2007 The theme of this book is how to transmit topical knowledge and recent findings in neurosciences to the needs of music educators The authors offer a comprehensive view of neuromusical research and its potential applications to music learning They take into consideration that 1 knowledge as such is not transferable we cannot force children to learn or push synapses to grow We can only provide a stimulating environment and environmental conditions that enhance and support learning and 2 knowledge acquisition is governed by factors that are not fully under conscious control and can hardly be influenced externally Nevertheless children learn and are extremely curious and eager to learn Their cortex is the organ where new experiences and knowledge are processed by interconnected neurons mental representations which become activated when a similar sensorial input is perceived Since musicians have become a favoured model of brain plasticity in neurosciences

pedagogical expectations arose that education could benefit from music and that neurosciences could underpin this assumption with solid and robust research data **Monde de la Musique** ,1987 International music studies

Bibliographic Guide to Education ,2002 lists publications cataloged by Teachers College Columbia University supplemented by The Research Libraries of The New York Public Library *The Development of Skill in Reading Music* Larry Scripp,1997
