There is the perception of being totally omniscient where one has access to all knowledge, having a complete understanding of everything. There is also the perception of being totally One with the Universe, One with Nature, or the Universal Mind. During this time, one is also experiencing the feeling of total love, acceptance, and peace. This book examines the relationship of mind as intelligence and consciousness to matter, energy, and space-time. The concepts of Universal Mind or Collective Unconsciousness are discussed and related to physical phenomena such as the holographic distribution of information throughout all of space and the universe. From the paintings of Salvador Dalí to Carl Jung's Archetypes and his Red Book, and how they describe our collective subconscious, to Machine Learning and Whole Genome Sequencing, The Universal Mind explores the collective world, consciousness, super intelligence, machine intelligence, and the practical applications in engineering, medicine, law, and politics. 537 Pages.
