

Next Generation of Pressure Regulator Technology

The Commercial Service Regulator Family of Products from the Technology Leader in Pressure Regulation

Every global customer has a unique gas system based on inlet pressures, delivery pressures, accuracy, flow and overpressure protection requirements. To meet these needs, customers currently utilize several regulator designs and overpressure protection methods from one or more suppliers. This results in nonstandard installations or meter sets, various maintenance requirements and methods, training issues and stocking of a multitude of spare parts.

To meet the current and future needs of worldwide customers, Emerson Process Management has designed the Commercial Service Regulator platform. This platform brings a patentable, modular design that has never been seen in previous regulators, resulting in:

- Easy product sizing and selection
- Broad platform, wide application coverage
- Reduced inventory through shared parts
- Reduced training and maintenance through streamlined design

The Ultimate in Selectivity

With three new actuator designs and modular components, the Commercial Service Regulator family's streamlined platform offers advanced capabilities for natural gas, industrial process and LP-gas applications. A carefully engineered fit makes it easy to select the exact pressure regulator and overpressure protection required.

Product Advantages:

- **Lower cost of ownership/ reduced time and expense for**
 - training
 - installation
 - maintenance
- **Highly configurable**
 - All actuators and slam-shut are fully rotational for installation in any orientation
 - External, internal or dual-registration for flexible skid and field installation
 - Multiple overpressure protection options
 - Balanced or unbalanced trim
- **Multiple body sizes and configurations to fit new and replacement applications**
