**Getting Textbooks to Every Child in Sub-Saharan Africa** Birger Fredriksen, Sukhdeep Brar, 2015-05-22 Textbooks play a key role in enhancing the quality of learning especially in the context of low income Sub Saharan African SSA countries characterized by large class size poorly motivated and inadequately trained teachers and short effective school years There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on Despite extensive investments by governments the World Bank and other development partners the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability textbooks are generally much more costly in SSA than in other developing regions The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop out rate Only two thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills And although quality improvement depends on many factors inside and outside the school there is wide agreement that availability of textbooks is both an indispensable and a cost effective way of improving the quality of

the learning process A recent World Bank study examined the actual costs of textbooks the scope for cost reduction the portion of a national budget countries allocate to teaching and learning materials TLMs and hurdles in the way of making textbooks available to student Some interesting findings from the study The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget The production process methods copyright length of print runs effective procurement practices rather than the production costs should be the target of cost saving strategies The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks

Alternative Views and Assessments of the Macapagal-Arroyo Presidency and Administration, 2004 *Economics of the Reversal in Gender Disparities in Education and Development* Masayoshi Okabe, 2025-09-30 This book examines the background and consequences of the reversal in gender disparities in education through the case of the Philippines While global education and development discourse has long emphasized girls disadvantage a reversal where boys are falling behind in education has also recently emerged in a number of countries in developing contexts This book critically investigates this issue in the Philippines hailed as the top runner of gender equality in Asia and the Pacific where boys especially those from poorer households and in rural areas are increasingly falling behind Drawing on data from three provinces across the archipelago s main regions Luzon Visayas and Mindanao the book empirically traces the background and consequences of the reversal in family dynamics and school environments amid poverty and uneven development It reveals that boys educational disengagement cannot be understood independently of broader socioeconomic structures While girls may outperform boys in education labor market and familial systems often continue to disadvantage women recursively shaping boys educational disengagement Through the lens of intergroup heterogeneity this book offers an in depth examination of the nature of the reversal The economics of reversal is thus used not merely to describe but to rigorously interrogate surface level shifts that may obscure deeper enduring asymmetries The book adopts an interdisciplinary approach combining development economics education and area studies aiming to bridge econometric rigor and field based contextual sensitivity It is intended for scholars educators policymakers and students interested in evolving patterns of education and development

This volume presents an expanded and refined development of the author's earlier research which was awarded the Main Prize at the 19th Asia Pacific Research Prize Iue Prize conferred by the Asia Pacific Forum Awaji Conference Japan **S & T Post**, 2006 **Philippine Human Development Report**, 2008 **Policy Statements** Philippines.
