Externalizing Migration Management Ruben Zaiotti, 2016-02-05 The extension of border controls beyond a country's territory to regulate the flows of migrants before they arrive has become a popular and highly controversial policy practice Today remote control policies are more visible complex and widespread than ever before raising various ethical political and legal issues for the governments promoting them The book examines the externalization of migration control from an interdisciplinary and comparative perspective focusing on remote control initiatives in Europe and North America with contributions from the fields of politics sociology law geography anthropology and history This book uses empirically rich analyses and compelling theoretical insights to trace the evolution of remote control initiatives and assesses their impact and policy implications It also explores competing theoretical models that might explain their emergence and diffusion Individual chapters tackle some of the most puzzling questions underlying remote control policies such as the reasons why governments adopt these policies and what might be their impact on migrants and other actors involved

The Transnational State Thomas Lacroix, 2024-05-23 This work in two parts examines the relations between transnational societies and states The second volume of this work contends that current policies meant to control or enhance transnational flows have led to the emergence of a transnational policy apparatus coined the transnational state This book proposes an innovative conceptual framework to grasp the transformations of the contemporary state in both sending and receiving countries It shows how states expand beyond national territorial limits by reaching out to migrants where they are In response to the migrants endeavours to circumvent the constraints imposed by selective migration policies public authorities expand the reach of their control beyond externalisation within internalisation and at expansion borders A totalitarian temptation seems to have seized contemporary state bureaucracies affecting the very nature of borders and societies The core argument of this research is that the development of the transnational state is not random It is a process shaping and shaped by the structures of the transnational society

Noncitizen Power Tendayi

Bloom, 2023-08-10 In *Noncitizen Power* Tendayi Bloom applies her novel politics of noncitizenism to global governance. Noncitizenism advocates examining political institutions from the perspectives of those who must live and act despite them. Noncitizen power may be essential in addressing some of our world's apparently most intractable challenges. By analysing civil society engagement in the 2018 UN Global Compact for Migration, Bloom examines how far those with the most direct experiences of difficulties arising from migration governance can contribute to shaping it. Interrogating its underlying narratives and how human agency is understood within them, she highlights how politics from grassroots activism to global deliberations necessarily involves real people. This book introduces some of those engaging in noncitizen politics, providing a critical contribution to contemporary debates on solidarity, participation, legitimacy and justice in the international system and in migration politics.

Global Mobility Regimes R. Koslowski, 2011-11-18 This volume considers global mobility as an alternative concept to international migration in order to gain insights into international cooperation on movements of people across international borders.

Disciplining the Transnational Mobility of People M. Geiger, A. Pécout, 2013-10-18 This volume scrutinizes new developments in contemporary mobility and migration politics and shows that they are based on a mix of traditional coercive interventions and less repressive and indirect practices.

Migration, Civil Society and Global Governance Carl-Ulrik Schierup, Branka Likic-Brboric, Raúl Delgado Wise, Gülay Toksöz, 2020-06-29 How do the United Nations, international organizations, governments, corporate actors and a wide variety of civil society organizations and regional and global trade unions perceive the root causes of migration, global inequality and options for sustainable development? This is one of the most pertinent political questions of the 21st century. This comprehensive collection examines the development of an emerging global governance on migration with the focus on spaces, roles, strategies and alliance making of a composite transnational civil society engaged in issues of rights and the protection of migrants and their families. It reveals the need to strengthen networking and convergence among movements that adopt different entry points to the same struggle: from fighting managed migration to contesting corporate control of food and land. The authors examine the opportunities and challenges faced by civil society in its endeavour to promote a rights-based approach within international and intergovernmental fora engaged in setting up a global compact for the management of migration, such as the Global Forum for Migration and Development and in other global policy spaces. Chapters 1, 3 and 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution 4.0 license. Chapters 1 and 6 and a Creative Commons Attribution Non-Commercial No Derivatives (CC BY-NC-ND) Chapter 3.

Curtain up Janina Stürner-Siovitz, 2022-12-14 *Curtain up* explores city diplomacy in global migration governance. The author lays out the paradox that cities, although increasingly de facto migration actors in an urbanizing world, lack channels to influence international policies that directly impact local realities. Drawing on ten case studies from around the world, the author shows that local governments strive to overcome this paradox through global level interaction with national and international actors.

contributing to the emergence of a role of cities in global migration governance Cities draw on this role to influence migration narratives place local issues on global agendas and demand a seat at decision making tables Advancing the analysis of cities as global level actors the author introduces role theory to migration studies and presents a series of timely policy recommendations These set out concrete steps towards a stronger institutionalization of city diplomacy in global migration governance This book is written for scholars of migration studies urban studies and international relations as well as for practitioners focusing on multi level migration governance city diplomacy and multi stakeholder partnerships

International Migration Governance and Public Goods Diego Caballero-Vélez, James C. Roberts, 2025-01-16 This edited volume will take an expansive view of the publicness of both the policies and the effects related to migration immigration and refugees It will include examinations of international systemic factors and local economic factors Because migration governance varies geographically the book will be organized by region It will include chapters on Africa Australia New Zealand and the Pacific Islands Europe North America and South America The book will be focused on how public goods theory provides deep understanding of the factors that affect migration governance and on how understanding the public goods nature of migration governance can help develop effective policies for addressing these problems **Global**

Migration Governance from Below Stefan Rother, 2022-07-21 After a long time of neglect migration has entered the arena of international politics with a force The 2018 Global Compact for safe orderly and regular migration GCM is the latest and most comprehensive framework for global migration governance Despite these dynamics migration is still predominantly framed as a state centric policy issue that needs to be managed in a top down manner This book proposes a difference approach A truly multi stakeholder multi level and rights based governance with meaningful participation of migrant civil society Drawing on 15 years of participant observation on all levels of migration governance the book maps out the relevant actors invited and invented spaces for participation as well as alternative discourses and framing strategies by migrant civil society It thus provides a comprehensive and timely overview on global migration governance from below starting with the first UN High Level Dialogue in 2006 evolving around the Global Forum on Migration and Development GFMD and leading up to the consultations for the International Migration Review Forum in 2022 **Improving the Governance of**

International Migration Bertelsmann Stiftung, Migration Policy Institute, 2012-01-03 Contemporary states are ambivalent about the global governance of migration They desire more of it because they know they cannot reach their goals by acting alone but they fear the necessary compromise on terms they may not be able to control and regarding an issue that is politically charged Currently there is no formal coherent multilateral institutional framework governing the global flow of migrants While most actors agree that greater international cooperation on migration is needed there has been no persuasive analysis of what form this would take or of what greater global cooperation would aim to achieve The purpose of this book the Transatlantic Council on Migration's fifth volume is to fill this analytical gap by focusing on a set of fundamental

questions What are the key steps to building a better more cooperative system of governance What are the goals that can be achieved through greater international cooperation And most fundamentally who or what is to be governed Handbook on the Governance and Politics of Migration Emma Carmel,Katharina Lenner,Regine Paul,2021-04-30 This innovative Handbook sets out a conceptual and analytical framework for the critical appraisal of migration governance Global and interdisciplinary in scope the chapters are organised across six key themes conceptual debates categorisations of migration governance regimes processes spaces of migration governance and mobilisations around it Governing Migration Beyond the State Andrew Geddes,2021-01-19 International migration has become a salient concern in global politics but there is also significant variation in governance responses By focusing on four key world regions Europe North America South America and Southeast Asia this book explores the underlying factors that shape governance responses Rather than focusing on the more visible outputs or outcomes of governance processes such as laws and policies this book opens the black box of migration governance to reveal how understandings and representations of the causes and effects of migration held by key governance actors in these four regions have powerful effects not only on governance outcomes but more broadly on the prospects for global migration governance By doing so the book shows how migration governance systems through their operation and effects can shape migration in its various forms and the lived experiences of migrants **Refugees, Migration and Global Governance** Elizabeth G. Ferris,Katharine M. Donato,2019-07-05 As debates about migrants and refugees reverberate around the world this book offers an important first hand account of how migration is being approached at the highest levels of international governance Whereas refugees have long been protected by international law migrants have been treated differently with no international consensus definition and no one international migration system This all changed in September 2016 when the 193 members of the United Nations unanimously adopted the New York Declaration on Refugees and Migrants laying the groundwork for the creation of governance frameworks for migrants and refugees worldwide This book provides a fly on the wall analysis of the opportunities and challenges of the two new Global Compacts on Refugees and Migration as governments international NGOs multilateral institutions and other actors develop and negotiate them Looking beyond the compacts the book considers migration governance over time and asks the bigger questions of what the international community can do on the one hand to affirm and strengthen safe orderly and regular migration to help drive economic growth and prosperity whilst on the other hand responding to the problems caused by increasing numbers of refugees and irregular migrants This highly engaging and informative account will be of interest to policy makers academics and students concerned with global migration and refugee governance
