**AI for Beginners 101** M. Morrison, 2025-10-02 *AI for Beginners 101* Finally an AI Guide That Actually Makes Sense Master AI in Minutes Not Months Even If You Can Barely Program Your Coffee Maker Stop feeling left behind while everyone else seems to get AI You keep hearing about artificial intelligence everywhere your friends are using it your coworkers are talking about it and your kids probably know more about it than you do Meanwhile you re stuck wondering Where do I even start Here s the truth You don t need a computer science degree to unlock AI s incredible potential You just need someone to explain it like you re a real person not a robot Why This Book Exists And Why You Need It Most AI books are written by tech bros for tech bros They re packed with confusing jargon assume you know things you don t and make you feel dumber with every page *AI for Beginners 101* is different It s written for the rest of us the people who want to understand AI without enrolling in MIT What You ll Actually Learn In Plain English The Smartphone Test If you can text your kids you can master AI tools 30 Second AI Wins Quick applications that save you hours immediately The Anti Jargon Approach Complex concepts explained like you re talking to a friend Real People Real Results How teachers entrepreneurs and retirees are using AI to level up their lives Future Proof Your Skills Stay relevant without becoming a tech expert Here s What Makes This Different No Coding Required Seriously If you can use Instagram you can use AI Results in Minutes Start seeing benefits before you finish your first coffee Written Like a Human No technical mumbo jumbo just clear friendly guidance Tool Recommendations Specific apps and platforms you can use today Confidence Building Go from AI anxious to AI awesome step by step The Bottom Line While everyone else is either intimidated by AI or drowning in technical manuals you ll be the person who actually gets it and

uses it effectively AI isn't going away Your choice isn't whether to learn it it's whether to learn it the hard way or the smart way Ready to join the AI confident crowd Scroll up and grab your copy now Your future self will thank you P S This book has already helped thousands of non techie people feel confident with AI You're next *We Can Teach That* Ewa Dziedzic-Elliott, 2024-11-28 Information literacy is a complex subject that finally arrived at the doorstep of school libraries For decades academic researchers have been trying to capture the essence of information literacy its educational cognitive and civic value The collection of book chapters offered in *We Can Teach That* is a handbook that can be used as an inspiration for teaching various types of literacy visual digital multicultural health and more The book asks important questions When do we start teaching information literacy How do we teach it How does it affect our students at their education level How does it prepare them for their post high school adult life Does it impact their transition to college or career Dziedzic Elliott and her collaborators provide a range of best practices and concepts that inspire thinking about teaching information literacy at all levels Although written with school librarians in mind the book can be easily adapted by teachers school administrators and even public librarians who are looking to incorporate information literacy elements in their daily practices The book challenges the reader to rethink what they know about digital or tech literacy breaks some stereotypical concepts about multicultural literacy and highlights the importance of literacies even in adulthood

**Invocational Media** Chris Chesher, 2023-10-19 Invocational Media critiques the sociotechnical power of digital technologies by introducing the concept of invocational media What is an invocation Ask your voice assistant and it will define it for you It is a media artefact that responds to many invocations such as seeking the weather forecast requesting any song you can name or turning on the lights almost magically This contemporary manifestation of the ancient practice of invocation gives an immediate response to your call in a way that Chris Chesher argues is the characteristic power of all computers which he redefines as invocational media This book challenges the foundations of computer science by offering invocation as a powerful new way of conceptualising digital technologies Drawing on media philosophy Deleuze Guattari Heidegger Latour Austin Innis and McLuhan it critiques the representationalism of data processing artificial intelligence and virtual reality Invocational media seem to empower individuals but necessarily subject users to corporate and government monopolies of invocation They offer many solutions but only by reducing everything to the same kind of act They complicate agency in their indifference as to whether invokers are human or non human With robotics they invoke material form to act physically and autonomously People willingly make themselves invocable to surveillance and control by creating their own profiles and marking themselves with biometrics This ground breaking book will change how you think about digital media by showing they are in fact invocational media **The Transfer of Knowledge through Art and Visualization** Anna Ursyn, 2023-12-06 This book offers strategies for the transfer of knowledge through combining information technology and visual arts and examining how to visually enhance and convey knowledge Specifically it presents a fresh look at how

technology based science inspired projects can be innovatively delivery through artistic methods It explores a selection of inventions gained through the collaboration of internationalist professionals in various fields of knowledge before outlining a new approach in how knowledge can be delivered using the inventions in a novel visual way through action based visual storytelling video graphical display and visualization Crucially it looks at how current media and techniques used for presenting topics in industries corporations commerce and marketing companies could be successfully translated and developed as a presentation skill in the school college or university environment It thus seeks to address the skills that prospective employers expect from students in terms of possessing the ability to create visual presentations of data solutions and products With a sharp focus on the current generation schools academies business and marketing companies and catering to the modern demand for novelty in presentation it makes a strong contribution to the conversation around professional collaboration visual communication knowledge transfer novel technologies and knowledge visualization
