constructionism by the American psychologist Ken Gergen and the leadership framework of British academic Keith Grint This book explicitly links the health of organizations to the psychological and emotional health of those who lead them concluding with the factors of teamwork and motivation Dialogical Leadership jettisons the idea that organizations are run by superheroes presenting a more realistic picture of the workplace This is the first book to isolate generative dialogue as the key mechanism for successful change and transformation programs in organizations It rejects the idea that successful organizations are rational systems conforming to scripts laid down by leaders and it places dialogue and co creation reciprocal exchange at the heart of successful change programs It starts from the kinds of questions leaders ask themselves their interior dialogue and the quality of their interactions with others their external dialogues which can as shown in this book be the difference between success and failure Relational Change Liz Wiggins, Harriet Hunter, 2016-12-15 Learn about alternative ways of managing the change experience to make it doable energising and transformative The process of change in all organizations corporate public sector and not for profit can be fraught overwhelming and unpredictable both for those experiencing change and for those charged with its implementation Relational Change presents a refreshingly readable and accessible alternative to the normal rhetoric of mechanistic top down change Instead Liz Wiggins and Harriet Hunter show how paying closer attention to personal interactions and relationships lies at the very heart of effective and sustainable change in organizations Exploring issues of power politics emotions and the way people and systems can become stuck in unhelpful patterns this book will help you work practically with the messiness of change The dynamic new ways discussed are highly relevant for life in organizations today and will apply to your life outside work too Integrating research and theory from a wide range of sources as well sharing their own extensive experience of leading change the authors present a stimulating and thought provoking people centred and relational approach that focuses on doing with others rather than doing to them Relational Change combines academically grounded theoretically robust thinking that explains the rationale for relational change with real world stories that will resonate with your own experience of change whether as a **Actionable Learning** Terrence Morrison,2001 seasoned or novice leader Dialogue - Culture - Philosophy Daniela G.
