Place, 500-1500 Renana Bartal, Neta Bodner, Bianca Kuhnel, 2017-04-21 Natural Materials of the Holy Land and the Visual
Translation of Place 500 1500 focuses on the unique ways that natural materials carry the spirit of place Since early
Christianity wood earth water and stone were taken from loca sancta to signify them elsewhere Academic discourse has
indiscriminately grouped material tokens from holy places and their containers with architectural and topographical
emulations two dimensional images and bodily relics However unlike textual or visual representations natural materials do
not describe or interpret the Holy Land they are part of it Tangible and timeless they realize the meaning of their place of
origin in new locations What makes earth stones or bottled water transported from holy sites sacred How do they become
pars pro toto signifying the whole from which they were taken This book will examine natural media used for translating loca
sancta the processes of their sanctification and how although inherently abstract they become charged with meaning It will
address their metamorphosis natural or induced how they change the environment to which they are transported their
capacity to translate a static and distant site elsewhere the effect of their relocation on users viewers and how their
containers and staging are used to communicate their substance **CICERO'S SELECT ORATIONS TRANSLATED INTO**
