Ulrich's International Periodicals Directory Carolyn Farquhar Ulrich,1998 The Role of Artificial Intelligence in Arachnology Kajal Kurmi,2025-09-24 Scientific Essay from the year 2025 in the subject Computer Sciences Artificial Intelligence grade A language English abstract The emergence of artificial intelligence AI in biological sciences has initiated a paradigm shift in research approaches enabling scientists to tackle long standing issues in ecology morphology and behaviour Arachnology the study of spiders and their relatives has relied upon time intensive and manual observation and data gathering techniques often impeded by the vast diversity and ecological complexity of spider species The present article evaluates the effect of AI in transforming how we conduct arachnological research focusing on three primary sectors of research dietary ecology sexual dimorphism and juvenile life stages AI includes machine learning deep learning and computer vision in which researchers can now explore large and heterogeneous datasets uncover ecological patterns that were previously inaccessible as well as provide precision beyond conventional approaches We integrate our understanding of the current state of AI in arachnology and subsidiaries review methods of innovation summarised case studies from recent literature and critically evaluate some of the opportunities and challenges presented by

incorporating AI into arachnology Further we do a contextual evaluation of the ramifications of AI based arachnology for biodiversity monitoring ecological theory and conservation policy We find that AI not only allows researcher to more efficiently and extensively study spiders but it also offers a foundation for the use of computational technologies in invertebrate biology The final part of the research offers suggestions for cross disciplinary partnerships consistency in data procedures and the responsible use of AI in biodiversity science

Transparent AI Defenses. A Random Forest Approach Augmented by SHAP for Malware Threat Evaluation Manas Yogi, Pendyala Devi Sravanthi, 2025-10-01 Master's Thesis from the year 2025 in the subject Computer Science Internet New Technologies grade A course M Tech language English abstract

The rapid evolution of malware poses an ever growing challenge to cybersecurity professionals and organizations worldwide As malicious software becomes more sophisticated traditional detection methods often fall short necessitating advanced solutions that not only identify threats but also provide clear explanations for their predictions This book *Transparent AI Defenses A Random Forest Approach Augmented by SHAP for Malware Threat Evaluation* emerges from this critical need offering a comprehensive exploration of an explainable artificial intelligence XAI framework tailored for malware analysis Our journey began with a desire to bridge the gap between the predictive power of machine learning and the interpretability demanded by security experts The Random Forest algorithm known for its robustness serves as the backbone of our approach while SHAP SHapley Additive exPlanations enhances it by delivering actionable insights into feature importance
