

Skip Shifting

Automatically skips unnecessary gears to increase shifting efficiency. Helps increase acceleration to achieve cruising speed quickly and smoothly period - spin global.

Creep Mode

Enables the driver to "creep" at low speeds, and offers ultimate control for curbing, spreading and paving.

Hill Start Aid

Prevents unintended roll back or roll forward. When the grade exceeds one percent, foundation brakes hold the truck for a controlled launch. It works when pointing uphill in drive or facing downhill in reverse.

Blended Pedal

Drivers can use the throttle to feather the clutch for seamless low-speed control.

Self-Adjusting Ceramic Clutch

Dual-plate ceramic clutch for improved durability in high GVW applications.

Engine Overspeed Protection

The transmission system upshifts, if necessary, to prevent engine overspeed in Drive, Manual and Low modes.

Electronic Clutch Actuator

Enhances maneuverability at lower and reverse speeds, and makes backing up even easier.

Smart Gear Selection

The appropriate starting gear is selected and makes shift decisions based on grade, vehicle weight, engine torque and throttle position—skip shifting when appropriate, making the most efficient shift changes.

Urge to Move

Drivers simply release the brake pedal to automatically inch forward, similar to the feel of a passenger car.

Oil-Level Sight Glass

Easy way to check fluid level for quicker preventative maintenance.

Multiple Operating Modes

Automatic, Manual and Low modes offer the driver full control. In Manual mode, the driver can override computerized shifts on demand. Using Low mode can help maximize engine braking and reduce wear on brakes.

Enhanced Engine Braking

Provides maximum engine braking to 600 horsepower or more.

Automatic Grade Braking

Downshifts the transmission to help slow the truck on long, steep descents and increases brake pad life.

Auto Neutral

Automatically switches the transmission into neutral, once the parking brake is engaged, to prevent potential movement.
