The Boeing F/a-18E/F Super Hornet and EA-18G Growler Brad Elward,2012 The story of how the Super Hornet and Growler came into existence is the focus of this new book The F A 18E F has its roots in the late 1980s Hornet 2000 study which itself evaluated ways to enhance the range payload and bring back capability of the existing F A 18 Hornet Through a series of trade offs imposed by largely limited defense funds what emerged was a versatile affordable strike fighter aircraft that has served the Navy well since its fleet introduction in 2002 The Growler has a similar history Itself an offshoot of the Super Hornet program the EA 18G brought many of the Super Hornet s attributes speed maneuverability self defense capability and advanced systems into the electronic attack community and is now posed to assume all such missions from the venerable EA 6B Prowler within the next few years The book draws on interviews with many of the key players in the F A 18E F and EA 18G program and on many press reports of the day to tell the story of how these aircraft were designed developed and deployed Moreover the book provides insights into the problems faced by these key individuals as well as the management methods they used to produce aircraft that have consistently been delivered at or ahead of schedule under cost and under weight

F/A-18E/F Super Hornet and EA-18G Growler Ken Neubeck,2020 The Boeing F A 18 E F Super Hornet is an evolutionary redesign of the McDonnell Douglas F A 18 A B Hornet The Legacy F A 18 Hornet first flew in 1980 and met the requirement for a multirole fighter to complement the larger and more expensive Grumman F 14 Tomcat serving in fleet defense interceptor and air superiority roles The Hornet proved to be effective but it was limited in combat radius due to fuel capacity This would be corrected with the newer and larger F A 18 Super Hornet design which is now the primary fighter attack aircraft used in the US Navy carrier fleet and has replaced both the legacy Hornet and the F 14 Tomcat Additionally the Super Hornet airframe design was used for the design of the EA 18G Growler which took over the electronic countermeasures ECM role of the EA 6B Prowler
