since the reappraisal of Gissing's works began to get under way in the early 1960s through the publication of many new editions of the works and ground breaking critical studies by Arthur Young Jacob Korg and Pierre Coustillas it has become impossible to ignore the high status he now enjoys by rights which resembles the position granted to him long ago by his contemporaries as one of the leading English novelists of the late nineteenth century This collection of essays is remarkable for its emphasis on women's issues addressed in Gissing's novels ranging from the inadequate education of women to the struggle for greater female independence within and without marriage Several contributors seek to define the precise nature and quality of Gissing's achievement and his place in the canon and in the process they open up fascinating new opportunities for future research

The Fiction of George Gissing Lewis D. Moore, 2014-01-10 Most of George Gissing's 23 novels have a certain air of autobiography despite Gissing's frequent arguments that his fictional plots bear little resemblance to his own life and experiences Starting with *Workers in the Dawn* 1880 almost all of Gissing's fictional works are set in his own time period of late Victorian England and five of his first six novels focus on the working class poor that Gissing would have encountered frequently during his early writing career While most recent criticism focuses on Gissing's works as biographical narratives this work approaches Gissing's novels as purely imaginative works of art giving him the benefit of the doubt regardless of how well his books seem to match up with the events of his own life By analyzing important themes in his novels and recognizing the power of the artist's imagination especially through the critical works of Coleridge Wordsworth Shelley and Keats the author reveals how Gissing's novels present a lived feel of the world Gissing knew firsthand The author asserts that at most Gissing used his personal experiences as a starting point to transform his own life and thoughts into stories that explain the social personal and cultural significance of such experiences
