 the pittas are unforgettable for those who have seen them flash past like a living jewel of the rainforest There are thirty pitta  
 species most of which live in South East Asia though two are found in Africa Their habitat is under threat and many species  
 are endangered This monograph breaks with tradition in a number of ways besides having all the normal sections for a guide  
 it also contains a complete list of all scientific synonyms and a bibliography of more than 1 300 references It includes a list of  
 all the little studied islands where pittas have been found and their status if known It gives the museum holdings of all pitta

 unique to the pitta family and which has never before been described in detail The book also describes the pittasi unique  
 moulting pattern immature birds moulting into their adult plumage are often found with bald heads and necks The beautiful  
 illustrations are painted in gouache by Helga Boulet Erritzoe using a dry brush technique Each plate has been meticulously  
 laid out to enhance the characteristics of each species All plates are cross referenced to the text which contains details of age  
 and sex of bird and the museum where the depicted bird skin is kept with its registration number Whilst it will be of
