Digital Energy Metering with Real Time Reading & Monitoring by using GSM Technology Muhammad

Junaid,2015-02-10 Scientific Essay from the year 2015 in the subject Electrotechnology grade N A course Electrical Power Engineering language English abstract Awareness on Power consumption is becoming vital these days The proposed system is made up of postpaid billing system which uses GSM Global System for Mobile Communication to provide effective and efficient power meter reading usage notification and distribution through wireless communication The postpaid meter is important in making the consumer having sense about his her energy consumption which is important in eliminating the difficulties facing the electrical utility employee in getting the reading of the conventional electromechanical meter and eliminating any error incurred in bills issuing The designed digital meter consists of GSM module a microcontroller a digital meter clients and server A GSM module is used to read the ID of the SIM Subscriber Identification Module card The server is located in the local substation which receives the SIM ID from clients and sends ID s information back to the client after checking and or updating the database Moreover the system also display the amount of energy consumed on the LCD Liquid Crystal Display The aim of the Research Project is to develop a system which uses microcontroller as a central part to provide postpaid services and it uses GSM to update the WAPDA Water and Power Development Authority Pakistan about the unit consumed with time and date So that consumer will be aware of their usage and for provider s error occur and resources use can be reduced

Senbagavalli,T. Kavitha,N. Amuthan,Ferdin Joe John Joseph,2025-04-17 Cloud Computing in Smart Energy Meter Management equips you with essential insights and practical solutions for effectively managing smart meter data through cutting edge technologies like artificial intelligence and cloud computing making it an invaluable resource for anyone looking to enhance their understanding of

modern energy management Cloud Computing in Smart Energy Meter Management presents a structured review of the current research on smart energy meters with artificial intelligence and cloud computing solutions This book will help provide solutions for processing and analyzing the massive amounts of data involved in smart meters through cloud computing Readers will learn about data storage processing and dynamic pricing of smart energy data in the cloud as well as smart metering concepts dealing with the flow of power consumption from consumer to utility center It offers an in depth explanation of advanced metering infrastructure AMI which includes meter installation meter advising commissioning integration master data synchronization billing customer interface complaints and resolution In smart cities components in household energy meters are fitted with sensors and can interconnect with the Internet of Things to measure power consumption with an automated meter reading This book also acts as a new resource describing new technologies involved in the integration of smart metering with existing cellular networks Cloud Computing in Smart Energy Meter Management provides knowledge on the vital role played by artificial intelligence and cloud computing in smart energy meter reading with precise evaluations
