Civil Airliner Flight Guidance Technology for Four-Dimensional Trajectory-Based Operation Guangwen Li, Shaobo Zhai, Qiuling Jia, 2024-09-16 This book focuses on achieving precision guidance and timely arrival in flight. The content comprehensively describes the civil aircraft flight guidance technology for four-dimensional trajectory-based operation. The main content of this book is the summary of the author's team's research work on flight management systems and flight guidance technology over the past decade, including flight plan analysis and transition path construction, four-dimensional trajectory planning and re-planning, high-precision flight guidance commands calculation, FMS landing system, etc. The theoretical methods described in the book have been verified by pre-research and practical engineering projects, which are of great theoretical significance and engineering application value. Factors in Aviation Eduardo Salas, Dan Maurino, 2010-01-30 Fully updated and expanded, the second edition of *Human Factors in Aviation* serves the needs of the widespread aviation community: students, engineers, scientists, pilots, managers, and government personnel. Offering a comprehensive overview, the volume covers topics such as pilot performance, human factors in aircraft design, vehicles and systems, and NextGen issues. The need for an up-to-date, scientifically rigorous overview is underscored by the frequency with which human factors/crew error cause aviation accidents, the pervasiveness of human error in safety breakdowns, technical and communication advances diminishing airspace, and the priority of aviation safety. All contribute to the generation of new human factors problems and the more extensive range of solutions. Now more than ever, a solid foundation from which to begin addressing these issues is needed. New edition thoroughly updated with 50% new material, offering full coverage of NextGen and other modern issues. Liberal use of case examples exposes students to real-world examples of dangers and solutions. Website with study questions and image collection. **Air Transportation** John

Wensveen, 2023-05-24 Now in its ninth edition, *Air Transportation: A Global Management Perspective* by John Wensveen is a well-proven, accessible textbook that offers a comprehensive introduction to the theory and practice of air transport management. The word "Global" has been added to the subtitle for this edition, reflecting an increased emphasis on worldwide operations, including North America, Latin America, Caribbean, Europe, Asia, Pacific, the Middle East, and Africa. The ninth edition focuses on the Age of Acceleration, addressing trends related to emerging technologies such as autonomy, artificial intelligence, augmented reality, virtual reality, 3D printing, data analytics, blockchain, cybersecurity, etc. New material includes extra information on airport management and operations, air carrier business models, aviation risk, safety, and security, and how changing political landscapes impact the aviation industry.

Enhanced content is supported by the addition of new chapters and online supplemental resources including PowerPoint presentations chapter quizzes exam questions and links to online resources This wide ranging textbook is appropriate for nearly all aviation programs that feature business and management Its student friendly structure and style make it highly suitable for modular courses and distance learning programs or for self directed study and continuing personal professional development
