*Salivary Bioscience* Douglas A. Granger, Marcus K. Taylor, 2020-04-07 This book provides the first comprehensive overview of the emerging field of interdisciplinary salivary bioscience. It serves as a foundational reference guide to the collection, analysis, and interpretation of salivary data as well as its myriad applications in medicine, surveillance, and public health. The ease and non-invasive nature of saliva collection makes it highly useful in diverse fields such as pediatrics, dentistry, neuroscience, psychology, animal welfare, and precision medicine. This book introduces students and scientists alike to the vast potential of salivary bioscience in both research and practice.

**The Science of Human Perfection** Nathaniel Comfort, 2012-09-25 Almost daily we hear news stories, advertisements, and scientific reports that promise genetic medicine will make us live longer, enable doctors to identify and treat diseases before they start, and individualize our medical care. But surprisingly, a century ago eugenicists were making the same promises. *The Science of Human Perfection* traces the history of the promises of medical genetics and of the medical dimension of eugenics. The book also considers social and ethical issues that cast troublesome shadows over these fields.

divDIV DIV Keeping his focus on America, science historian Nathaniel Comfort introduces the community of scientists, physicians, and public health workers who have contributed to the development of medical genetics from the nineteenth century to today. He argues that medical genetics is closely related to eugenics and indeed the two cannot be fully understood separately. He also carefully examines how the desire to relieve suffering and to improve ourselves genetically, though noble, may be subverted. History makes clear that as patients and consumers, we must take ownership of genetic medicine, using it intelligently, knowledgeably, and skeptically, lest pernicious interests trump our own.

**The Art of Classic Planning** Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable, demonstrating how we can restore function and beauty to our urban spaces for the long term. Nearly everything we treasure in the world's most beautiful cities was built over a century ago. Cities like Prague, Paris, and Lisbon draw millions of visitors from around the world because of their exquisite architecture, walkable neighborhoods, and human scale. Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years, not because of traffic, population growth, or other practical hurdles, but because of ill-considered theories emerging from Modernism and reactions to it. The errors of urban design over the last century are too great not to question. The solutions being offered today—sustainability, walkability, smart and green technologies—hint at what has been lost and what may be regained, but they remain piecemeal and superficial. In *The Art of Classic Planning*, architect and planner Nir Haim Buras documents and extends the time-tested and holistic practices that held sway before the reign of Modernism. With hundreds of full-color illustrations and photographs that will captivate architects, planners, administrators, and developers, *The Art of Classic Planning* restores and revitalizes the

foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L  
 Infant s Washington Haussmann s Paris and Burnham s Chicago Buras combines theory and a host of examples to arrive at  
 clear guidelines for best practices in classic planning for today s world The Art of Classic Planning celebrates the enduring  
 principles of urban design and invites us to return to building beautiful cities California Cooperative Oceanic Fisheries

 Wöbse,Patrick Kupper,2021-12-20 Today the environment seems omnipresent in European policy within and beyond the  
 European Union The idea of a shared European environment however has come a long way and is still being contested  
 Greening Europe focuses on the many ways people have interacted with nature and made it an issue of European concern  
 The authors ask how notions of Europe mattered in these activities and they expose the many entanglements of activists  
 across the subcontinent who set out to connect and network and to exchange knowledge worldviews and strategies that  
 exceeded their national horizons Moving beyond human agency the handbook also highlights the eminent role nature played  
 in both greening Europe and making Europe a shared environment **The Intellectual Property and Food Project**  
 Charles Lawson,Jay Sanderson,2016-03-03 The relationship between intellectual property and food affects the production  
 and availability of food by regulating dealings in products processes innovations information and data With increasingly  
 intricate relations between international and domestic law as well as practices and conventions intellectual property and food  
 interact in many different ways This volume is a timely consideration and assessment of some of the more contentious and  
 complex issues found in this relationship such as genetic technology public research and food security socio economic factors  
 and the root cause of poverty and patent busting The contributions are from leading scholars in this emerging field and each  
 chapter foregrounds some of the key developments in the area exploring historical doctrinal and theoretical issues in the  
 field while at the same time developing new ideas and perspectives around intellectual property and food The collection will  
 be a useful resource in leading further discussion and debate about intellectual property law and food **Yearbook of
