Cooking in Other Women's Kitchens, Enhanced Ebook Rebecca Sharpless, 2013-02-01 As African American women left the plantation economy behind many entered domestic service in southern cities and towns Cooking was one of the primary jobs they performed feeding generations of white families and in the process profoundly shaping southern foodways and culture In *Cooking in Other Women's Kitchens Domestic Workers in the South 1865-1960* Rebecca Sharpless argues that in the face of discrimination long workdays and low wages African American cooks worked to assert measures of control over their own lives As employment opportunities expanded in the twentieth century most African American women chose to leave cooking for more lucrative and less oppressive manufacturing clerical or professional positions Through letters autobiography and oral history Sharpless evokes African American women's voices from slavery to the open economy examining their lives at work and at home The enhanced electronic version of the book includes twenty letters photographs first person narratives and other documents each embedded in the text where it will be most meaningful Featuring nearly 100 pages of new material the enhanced e book offers readers an intimate view into the lives of domestic workers while also illuminating the journey a historian takes in uncovering these stories *The Cumulative Book Index*, 1922 *The Baptist Memorial and Monthly Record*, 1848 **Building Blocks of Society** James W. Cortada, 2020-11-25 The history of information is a rapidly emerging new subfield of history Historians are identifying the issues they need to examine crafting novel research agendas and locating research materials relevant to their work Like the larger world around them historians are discovering what it means to live and work in a world that increasingly sees itself as an information society Long a discussion point among sociologists economists political leaders and media experts historians are integrating their methods and research into the larger conversation This book proposes a way to look at the history of information and to history as a whole that is simultaneously relevant to observers in other disciplines and familiar to historians of business economics sociology and technology The author presents that advocacy in two ways with theoretical and historiographical discussions of what information ecosystems and infrastructures are and their value for this kind of research second through a range of case studies applying those concepts The wide range of case studies is purposeful in demonstrating the applicability of the ideas presented in the early methodological chapters Themes mentioned in each of the early chapters are consistently applied in all subsequent chapters This book breaks from the more traditional historiography of book history sociological and philosophical discussions about knowledge and society The first two chapters focus on the craft of the historian in this new field better known as historiography and methods Subsequent chapters are case studies showing what results when a historian writes about ecosystems and infrastructures moving our discussion from theory to practice The book is an important and substantive contribution to this new subfield an essential primer as well as a major statement for all historians on how next to evolve their craft **The United States Catalog**, 1924 *Cumulated Index to the Books*, 1921-07 *Culinary Landmarks*

Muckenhaupt,2020-08-25 Forages through New England s most famous foods for the truth behind the region s culinary myths Meg Muckenhaupt begins with a simple question When did Bostonians start making Boston Baked Beans Storekeepers in Faneuil Hall and Duck Tour guides may tell you that the Pilgrims learned a recipe for beans with maple syrup and bear fat from Native Americans but in fact the recipe for Boston Baked Beans is the result of a conscious effort in the late nineteenth century to create New England foods New England foods were selected and resourcefully reinvented from fanciful stories about what English colonists cooked prior to the American revolution while pointedly ignoring the foods cooked by contemporary New Englanders especially the large immigrant populations who were powering industry and taking over farms around the region The Truth about Baked Beans explores New England s culinary myths and reality through some of the region s most famous foods baked beans brown bread clams cod and lobster maple syrup pies and Yankee pot roast From 1870 to 1920 the idea of New England food was carefully constructed in magazines newspapers and cookbooks often through

fictitious and sometimes bizarre origin stories touted as time honored American legends This toothsome volume reveals the effort that went into the creation of these foods and lets us begin to reclaim the culinary heritage of immigrant New England the French Canadians Irish Italians Portuguese Polish indigenous people African Americans and other New Englanders whose culinary contributions were erased from this version of New England food Complete with historic and contemporary recipes The Truth about Baked Beans delves into the surprising history of this curious cuisine explaining why and how New England food actually came to be      *Cumulative Book Index* ,1921 A world list of books in the English language      **The**
