Contemporary Psychiatric Mental Health Nursing Study Guide:

Contemporary Psychiatric-mental Health Nursing Carol Ren Kneisl, Holly Skodol Wilson, Eileen Trigoboff, 2004

Millions of people worldwide suffer from mental health disorders. In fact, five of the leading causes of disability in the world today are psychiatric in nature. Psychiatric mental health nursing is a specialized area that employs a wide range of explanatory theories and research on human behavior as its science and the purposeful use of self as its art. Understanding people who are searching for meaning through interaction in complex times demands the most authoritative and contemporary knowledge and clinical competence. It is through the power of knowledge and clinical competence that psychiatric mental health nurses can help clients from diverse cultures to live with uncertainty, unfamiliarity, and unpredictability and to pursue creative healing on psychobiologic and spiritual levels. Our goal for this textbook, *Contemporary Psychiatric Mental Health Nursing* and its companion supplements, is to provide students and practicing psychiatric mental health nurses with the most up-to-date evidence-based, culturally competent, authoritative, comprehensive resource available and to present it in an accessible, clinically relevant, and professional format.

UNDERLYING THEMES

Throughout this textbook, we as authors try to remain true to values of humanism, interactionism, cultural competence, the relevance of meaning, and the importance of empathy and empowerment in the nurse-client relationship. We believe that psychiatric mental health nursing is concerned with the quality of human life and its relationship to optimal psychobiologic health, feelings of self-worth, personal integrity, self-fulfillment, spirituality, and creative expression. The psychiatric mental health nurse's scope of practice is broad enough to include issues such as alienation, identity crises, sudden life changes, and troubled family relationships. It may involve issues of poverty and affluence, cross-cultural disparities in access to health care, and the human experiences of birth, death, and loss. Psychiatric mental health nursing is concerned with sustaining and enhancing the mental health of both the individual and the group, while its practice locale is often found in the community. In exploring the theme of global mental health, each unit of this book opens with compelling photographs and stories of individuals from around the world who face a variety of mental health issues. By presenting the readers with this global perspective, we hope to promote awareness of the relevance of those same global issues in our own culturally diverse society. Along these lines, we selected a *Mandala* to represent the essence of this book. *Mandala* is the Sanskrit word for circle and symbolizes wholeness or organization around a unifying center. The goal of this book is to explore science, art, and spirituality as a path toward our shared vision of global mental health. It is a synthesis of elements important to a holistic view. The *Mandala* used throughout this book and on its cover is entitled *The Great Mother*, created by Cynthia Cunningham Baxter. It consists of hands and a mother tree, which is consistent with nursing's goals of care, compassion, and comfort.

CONTEMPORARY TRENDS

The themes, ideas, knowledge, tools, and organization of this textbook were expressly designed for psychiatric mental health nursing students and clinicians who are committed to developing the habits of mind, responsibility,

and practice that will make a difference in view of contemporary trends Specifically this text prepares students to tailor and humanize interventions for traditional as well as new psychiatric mental health clients often encountered in forensic settings homeless shelters and in other community based and rehabilitation oriented settings Furthermore because advances in neuroscience and the study of the human genome are redefining our conception of the basis for mental disorders a solid grounding in psychobiology is threaded throughout the book Brain imaging assessment and concise yet comprehensive information on the expanding array of psychopharmacologic treatment is yet another strong emphasis We recognize that psychiatric mental health clients are racially and culturally diverse and include growing numbers of mentally ill elders children adolescents and people with coexisting substance use disorders or comorbidities with other chronic illnesses such as HIV AIDS Therefore we devote separate chapters to each of the above topics We feel confident in entitling this book Contemporary Psychiatric Mental Health Nursing because of its explicit links to contemporary trends in our field

ORGANIZATION The detailed table of contents at the beginning of the book makes its clear organization easy to follow The book is divided into five parts Unit I clusters six chapters that provide comprehensive coverage of the theoretic basis for psychiatric mental health nursing In Unit II we address topics traditionally associated with psychiatric mental health nursing such as using the nursing process therapeutic communication assessment advocacy and client rights and creating a therapeutic environment Unit III focuses on caring for clients with specific DSMIV TR mental disorders First we outline the defining characteristics of each disorder then we cover the biopsychosocial theories necessary to understand them and finally we apply the nursing process to caring for clients with these disorders Unit IV shifts the focus to vulnerable populations that require comfort and care from psychiatric mental health nurses These populations include people at risk for self destructive behavior abuse or violence psychiatric mental health clients with HIV AIDS and specific age groups Unit V of the book provides authoritative coverage of nursing intervention strategies and desired outcomes including a wide range of modalities from individual group and family interventions to psychopharmacology and complementary and alternative healing practices Throughout the book experts contributed their knowledge and skills on all the topics covered

FEATURES The following noteworthy features weave together the threads of research theory and practice into a comprehensive and contemporary fabric of knowledge and competencies essential to psychiatric mental health nursing The content and processes are clearly applicable to the care of identified psychiatric mental health clients yet they are also relevant when integrated into the care of all those with whom we interact as professional nurses

Using Research Evidence In addition to a full chapter devoted to evidence based psychiatric mental health nursing practice Chapter 3 each chapter includes a clinical vignette illustrating how research evidence shapes the plan of care for a particular client

Case Based Critical Thinking Challenges Because critical thinking skills are essential to evidence based practice a Critical Thinking Challenge begins each chapter challenging readers to analyze a case scenario that is related to the chapter topic The discussion points for the

critical thinking challenge appear in the Instructor's Resource Manual accompanying this text. Caring for the Spirit: These boxes reinforce the belief in the interconnection of mind, body, and spirit. They appear throughout the book and are designed to promote the understanding of the client's essence, meaning, and purpose in life, as well as the nurse's role in supporting spirituality. Culture and Family Awareness: Icons throughout the book call the reader's attention to content that bears on the importance of developing cultural competence and the value of including the family as partners in psychiatric mental health care. Medication: Icons throughout identify sections of the text that discuss psychopharmacology. Case Studies and Nursing Care Plans: Are found in each of the clinical chapters. These plans use NANDA, NOC, and NIC nomenclature and illustrate linkages among them when caring for clients diagnosed with specific mental disorders according to the DSM-IV-TR. Assessment Guidelines, Intervention Guidelines, Client/Family Teaching: Boxes all present clinically relevant strategies in a succinct, user-friendly format. Assessment Guidelines contain lists of assessment points. Intervention Guidelines list specific nursing intervention strategies along with their rationales. Client/Family Teaching boxes provide specific client-oriented information that contains sample language a nurse can use when working with clients. Nursing Self-Awareness: Appearing throughout the book, these boxes engage the reader in a process of introspection and self-questioning that is essential to the therapeutic use of self. Rx Communication: Each of the clinical chapters focuses on clients within a particular psychiatric diagnostic category and includes a specially designed box to offer sample dialogues of what a nurse can say in response to clients. In addition, we provide the rationale for at least two different but helpful alternatives. This feature is designed to provide students with a beginning repertoire of communication interventions useful when interacting with psychiatric mental health clients. Case Management, Community-Based Care, and Home Care: Each of the psychiatric disorders chapters and vulnerable populations chapters includes specific information that reflects the fact that the setting for much of psychiatric nursing practice today is found in the community rather than in the hospital. MediaLink and EXPLORE MediaLink: At the beginning of each chapter, a MediaLink box lists specific content, animations, and videos. NCLEX review questions, tools, and other interactive exercises that appear on the accompanying Student CD-ROM and the Companion Website. Special MediaLink tabs appear in the margins throughout the chapter that refer the student to the topics and activities on the media supplements. Finally, at the end of each chapter, EXPLORE MediaLink sections encourage students to use the CD-ROM and the Companion Website to apply what they have learned from the text in case studies and care plans to practice NCLEX questions and to use additional resources. The purpose of the MediaLink feature is to further enhance the student experience, build upon knowledge gained from the textbook, prepare students for the NCLEX, and foster critical thinking. Focus Questions: Provide the reader with guidance for actively reading the chapter and getting the most out of it. Key Terms: Alert the reader to the vocabulary used in the chapter and are available in the Audio Glossary found on the Student CD-ROM or the Companion Website. Cross References: Pinpoint specific content linked to supporting chapters when more depth is required. An

icon refers the reader to content in other sections of the book References Each chapter includes a bibliography of the most up to date resources on the topic WebLinks throughout guide the reader to online information which can be accessed via the Companion Website at www.prenhall.com/kneisl COMPREHENSIVE TEACHING AND LEARNING PACKAGE The following supplements were developed to support Contemporary Psychiatric Mental Health Nursing and enhance both the student and instructor experiences in this course Student CD ROM This CD ROM is packaged free with the textbook It provides an interactive study program that allows students to practice answering NCLEX style questions with rationales for right and wrong answers It also contains an Audio Glossary animations and video clips and a link to the Companion Website an Internet connection is required Companion Website www.prenhall.com/kneisl This free online study guide is designed to help students apply the concepts presented in the book Each chapter specific module features objectives Audio Glossary chapter summary for lecture notes NCLEX Review questions case studies care plan activities class discussion questions WebLinks and Nursing Tools such as Standards of Psychiatric Mental Health Nursing Practice and more Faculty adopting this textbook have free access to the online Syllabus Manager feature of the Companion Website Syllabus Manager offers a whole host of features that facilitate the students use of the Companion Website and allows faculty to post syllabi and course information online for their students For more information or a demonstration of Syllabus Manager please contact a Prentice Hall Sales Representative Clinical Companion for Psychiatric Mental Health Nursing This clinical companion serves as a portable quick reference to psychiatric mental health nursing Topics include DSM IV TR classifications common diagnostic studies over 20 clinical applications for mental health disorders medications and much more This handbook will allow students to bring the information they learn from class into any clinical setting Instructor s Resource Manual This manual contains a wealth of material to help faculty plan and manage the Mental Health Nursing course It includes chapter overviews detailed lecture suggestions and outlines learning objectives discussion points a complete test bank answers to the textbook critical thinking exercises teaching tips and more for each chapter The IRM also guides faculty on how to assign and use the text specific Companion Website www.prenhall.com/kneisl and the free student CD ROM that accompany the textbook Instructor s Resource CD ROM This cross platform CDROM provides illustrations and text slides in PowerPoint for use in classroom lectures It also contains an electronic test bank answers to the textbook critical thinking challenges and animations and videos from the Student CDROM This supplement is available to faculty free upon adoption of the textbook Online Course Management Systems Also available are Blackboard WebCt and CourseCompass online companions available for schools using course management systems The online course management solutions feature interactive modules electronic test banks PowerPoint slides including images and discussion points animations and video clips and more For more information about adopting an online course management system to accompany Contemporary Psychiatric Mental Health Nursing please contact your Prentice Hall Health Sales Representative or go online to www.prenhall.com/demo THE TEXTBOOK AS A MAP A
