Lloyd,2015-07-04 Excerpt from The Teaching of Biology in the Secondary School The advances which botany has made in America during the last twenty five years have been not alone in the science itself and in its economic phases but also in the field of education From being an occasional study it has become in our best schools a constant element in the curriculum Instead of the superficial examination of the external structures of flowers a study supposed to be rather of the nature of an accomplishment than a means for wholesome discipline the good course in botany of the present time presents the important ideas of all the phases of the science and is based upon the observation and experimentation of living plants These changes have made necessary the employment of teachers with a special mental equipment for their peculiar task From being taught incidentally botany has become the chief concern of a large body of men and women who have received the best training our schools have afforded The most important criticism which may be made at the present time is that those who enter the profession of teaching in the field of botany and its allied subject zoology do so generally without any special consideration of the problems which they are called upon to face in their work It is to bring the student face to face with these problems and to prepare him for their intelligent consideration that this book has been written About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Biology in**
