3. What are some micro-interactions to consider when designing a Fintech app?
4. Create a text-based Excel sheet to input your copy suggestions. Assume you have 3 members in your UX writing team.

C.R.E.A.T.E Formula for Prompt Engineering

1. **C: Character** - Define the AI's role. E.g., "You are a seasoned copywriter with 20 years of experience in successful sales copy."
2. **R: Request** - Be specific with what you need. Instead of "Write a sales email for a sports car," specify, "Write a compelling email for the Cougar Hyper Sport, an electric car with top-tier acceleration."
3. **E: Examples** - Optionally, provide samples for more precise results. Headlines or tone examples can guide the AI's style.
4. **A: Adjustments** - Refine the prompt if it's not perfect. Use instructions like, "Avoid bullet points; use subheads."
5. **T: Type of Output** - Describe the desired format. E.g., "Produce a 500-word article with a title and conclusion."
6. **E: Extras** - Incorporate unique instructions.
 - Ex: "Ignore previous conversations."
 - Ex: "Ask questions before answering."
 - Ex: "Explain your thinking."
 - Ex: "Summarize what you know about me in the first person."
 - Ex: "Use data up to 2023."
 - Ex: "Only use reliable sources and cite them."
 - Ex: "Use CAPS LOCK for emphasis."

Using the C.R.E.A.T.E formula ensures better results, although it may require more time for prompt creation.
