Christie,J. R. Martin,2005-03-01 This book examines genres as instances of social processes enacting a range of important
institutional practices hence also shaping people s subjectivities Genres represent purposive and staged ways of building
means in a culture The book s particular claim to originality is that using systemic functional grammar it demonstrates how
given genres build or enact social practice how educational setting provide contexts in which some apprenticeship into such
genres occurs and how theorizing about such matters helps build a theory of social action revealing how powerful is the
systemic functional analysis in addressing questions concerning the social construction of reality The discussion is built
around extensive analysis of instances of texts collected in a number of worksites and school settings While most are
instances of written genres some are spoken most notably the chapter that is devoted to the discussion of the spoken
classroom texts in which the teaching and learning of the written genres take place **Manual on the Building of
