Choosing a Dissertation Topic: Common Difficulties

INITIAL CONSIDERATIONS:

- The topic should be relevant to your programme of study
- It should be related to one or more of the areas of study within your programme
- It should be restricted in scope to allow you to treat the topic in-depth – a broad approach rarely succeeds
- You must consider **the availability of adequate sources of materials – literature and access to any primary sources you may need**
- You must realistically assess the time any topic or question may demand
- It does not have to be an original topic or question
- It should be of interest to you

Engaging Undergraduates in Publishable Research: Best Practices Traci A. Giuliano, Jeanine L. M. Skorinko, Marianne Fallon, 2019-11-20 Although many articles and books have been written about conducting research with undergraduates, there is a dearth of research on the process of publishing with undergraduates. Thus, in this research topic, we assembled a collection of 43 articles from 98 researchers worldwide who are passionate about and have had success in publishing high-quality, peer-reviewed journal articles with undergraduates. The diverse articles represent a wide range of practices to help researchers publish with undergraduates, including structuring the curriculum to promote undergraduate research and publication, optimizing research experiences for undergraduates, training students in implementing advanced techniques, accessing special populations, or conducting research in off-campus settings, addressing institutional and career challenges for faculty, and increasing inclusion and diversity. Each article provides a unique and diverse perspective that nevertheless resonates across contexts and situations. We hope that the ideas, models, techniques, and practices in these articles will motivate and inspire readers to begin, continue, or rethink how they engage undergraduates in publishable research. We also hope to stimulate empirical and quantitative research on the effectiveness of these ideas, models, techniques, and practices.
