Aligning Third-grade Fractions Curriculum with the Common Core State Standards: a Teacher's Plan for Implementation Brooke L.N.. Webster, California State University, Sacramento, 2013

The last implementation of state standards was in 1997 when California and the rest of the country were in an economic climate that supported growth in so many aspects including education. In 2010 the state of California adopted new State Standards set forth by the federal and state governments. California teachers are tasked with implementing these standards however many teachers are not being provided with the necessary tools to support their teaching. With larger class sizes and little to no money teachers are being asked to change in an environment that offers them little to no support. Common Core Standards are of the educational future in California. Due to the lack of financial support in buying new curriculum that aligns to these standards teachers will have to rely on their own professional practices to help them implement these new standards. For the teachers in many districts this means developing support lessons and materials that align with these new standards while using their old non-aligned curriculum as the base. This master's project will help teachers to bridge the curricular gap in the fractions unit of the third grade math curriculum. Macmillan McGraw Hill 2008. The project's supplemental lessons will coincide with the textbook lessons while at the same time aligning with the CCSS. This project includes written lesson plans that can be easily implemented by third grade teachers in my district and will assist them to be teaching based upon the new CCSS. Using the current third grade curriculum alongside the Common Core State Standards. National Governor's Association Center for Best Practices and Council of Chief State School Officers NGA CCSSO 2010 as well as other fractions resources I developed supplemental fractions lessons that any teacher could use. In addition to the detailed lessons themselves the project contains all instructional materials including student in-class worksheets and suggested assessments.

Guided Math Lessons in Third Grade Nicki Newton, 2011-11-29. *Guided Math Lessons in Third Grade* provides detailed lessons to help you bring guided math groups to life. Based on the bestselling *Guided Math in Action* this practical book offers 16 lessons taught in a round of 3 concrete pictorial and abstract. The lessons are based on the priority standards and cover fluency word problems fractions and place value. Author Dr. Nicki Newton shows you the content as well as the practices and processes that should be worked on in the lessons so that students not only learn the content but also how to solve problems, reason, communicate, their thinking model, use tools, use precise language and see structure and patterns. Throughout the book you'll find tools, templates and blackline masters so that you can instantly adapt the lesson to your specific needs and use it right away. With the easy-to-follow plans in this book students can work more effectively in small guided math groups and have loads of fun along the way. Remember that guided math groups are about doing the math. So throughout these lessons you will see students working with manipulatives to make meaning, doing mathematical sketches to show what they understand and can
