

# PATTERNS & FUNCTIONS

Use the rule to create a pattern.

Starting at 0, Multiply by 2, then add 2.

Pattern: \_\_\_\_\_

Katie was in the cross-country running club at school. The first week, she ran 2 miles. The second week, she ran 3 miles. The next week, she ran 5 miles, and the week after that, she ran 8 miles. If this pattern continues, how many miles will she run in her 8<sup>th</sup> week?

Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8

Pattern: \_\_\_\_\_

The number of red ornaments ( $r$ ) is 8 more than the number of green ( $g$ ) ornaments on a tree. Write an equation to show how many red ornaments are on a tree, then complete the function table.

Equation: \_\_\_\_\_

$g$	$r$
8	16
10	18
12	20

The number of minutes spent reading ( $m$ ) is 5 times the number of pages read ( $p$ ). Write an equation to show how many minutes are spent reading, then complete the function table.

**OUTPUT FUNCTION OF MACHINE LEARNING** Dr. Sambit Satpathy,Abdullah Al Salmani,Dr. S. Sivakumar,Dr. Malik Mustafa,2023-05-23 Along with the use of other technological tools such as sensors the proliferation of social media websites like Google Facebook and Twitter as well as other similar platforms are accountable for the generation of a sizeable amount of brand new information all over the world This data is compiled and stored in various databases for potential use in the future The sensors are used to collect information from the physical environment and communicate it to the computer Social media websites provide a high level platform for users to analyze market chapters and make decisions An analyst or data scientist will on a day to day basis face a variety of challenges some of which include the following obtaining the data storing the data sharing the data sending the data analyzing the data and displaying the results of the analysis Some of these challenges include obtaining the data storing the data sharing the data sending the data analyzing the data and displaying the results of the analysis After coming to the realization that overcoming all of the difficulties listed above would not be a simple feat we decided to concentrate our efforts primarily on data filtering Because we anticipated that the process of filtering would be the most difficult obstacle to overcome we devised a plan that would center on the categorization of the

data that is present in our immediate environment Simply put there is an excessive amount of data to be regulated in such a manner and expect it to be successful It is useless and has no sense until those giant characteristics with unbelievable dimensions are identified and it consists of enormous characteristics with huge dimensions Until then it is meaningless and has no sense It is essential to transform these high dimensional data into low dimensional data so that a more effective machine learning model can be developed to classify the data and so that the processing of the data may be simplified It is possible to rapidly train the high accuracy model utilizing low dimensional data which involves significantly less effort and time than traditional methods When we engage in activities in the real world we are frequently put in situations in which we are confronted with information and things that to be properly labelled require some form of classification It is a very critical responsibility to check and see that both the data and the item in question have the right labels to describe what they are
