Statistics for Social Understanding Nancy E. Whittier, Tina Wildhagen, Howard J. Gold, 2024-08-06 *Statistics for Social Understanding* introduces statistics as it is used in the social sciences as a tool for advancing understanding of the social world. The authors provide thorough coverage of social science statistical topics, a balanced approach to calculation and step-by-step directions on how to use both SPSS and Stata software, giving students the ability to analyze data and explore exciting questions. In-Depth boxes encourage critical thinking by tackling tricky statistical queries, and each chapter concludes with a chapter summary, a section on using Stata, a section on using SPSS, and practice problems. All problems have been accuracy checked by an outside panel of reviewers. Readily available datasets for classroom use include material from institutions such as the American National Election Study, General Social Survey, World Values Survey, and the School Survey on Crime and Safety. *Statistics for Social Understanding* is accompanied by a learning package written entirely by author Tina Wildhagen that is designed to enhance the experience of both instructors and students.

Opening with an introduction to Excel, including coverage of how to use functions and formulas, this edition shows students how to install the Excel Data Analysis Tools option to access a host of useful analytical techniques. New to the Fifth Edition is new co-author Bruce Frey, who has added a new feature on statisticians throughout history with a focus on the contributions of women and people of color. He has updated the Real World Stats feature and added more on effect sizes, updated the discussions on hypotheses, measurement concepts like validity and reliability, and has more closely tied analytical choices to the level of measurement of variables.
