Evaporative Cooling

Evaporative cooling is an economical way to cool. Air is cooled while being drawn across wet evaporative media. The movement of this fresh cooled air over the skin is what makes it feel cool. It is important when using an evaporative cooler in an enclosed space to have adequate exhaust by opening windows, doors, etc. Without an outlet to exhaust the air, humidity will build up in the enclosed space and the unit will not cool adequately. It is preferable to have an opening behind the unit to bring in fresh air and another opening across the room to exhaust and help move the air.

Safety Rules

1. Unit must be in the Off Position and Unplugged from power receptacle when performing any maintenance.
2. To reduce the risk of electric shock, plug unit into a properly grounded 120 Volt A.C., 60-Hz receptacle.
3. To reduce the risk of electric shock, install only on a circuit protected with a Ground Fault Circuit Interrupter (GFCI).
4. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

⚠ WARNING: To reduce the risk of fire or electric shock, do not use this fan with any "solid-state fan speed control device."
