Ecdl Manual Module 4:

Information Technology Standards and Standardization Kai Jakobs, 2000 This volume paints a picture of the varied and diverse aspects surrounding information technology standards and standardization and aims to serve as a foundation for research discussion and practice

A deep ultraviolet laser light source by frequency doubling of GaN based external cavity diode laser radiation Norman Ruhnke, 2022-05-13 A compact and portable laser light source emitting in the wavelength range between 210 nm and 230 nm would enable numerous applications outside of laboratory environments such as sterilization and disinfection of medical equipment water purification or gas and air analysis using absorption spectroscopy Such a source is also highly attractive for the identification and quantification of proteins and biomolecules by means of laser induced fluorescence or Raman spectroscopy In this thesis a novel concept to realize such a compact and portable laser light source with low power consumption and an emission around 222 nm is investigated The developed concept is based on single pass frequency doubling of a commercially available high power GaN laser diode emitting in the blue spectral range Due to the low frequency doubling conversion efficiencies in this wavelength range of about 10⁻⁴ W⁻¹ a laser diode with high optical output power above 1 W is required as pump source Moreover it has to exhibit narrowband emission in the range of the acceptance bandwidth of the applied nonlinear BBO crystal Since GaN based high power laser diodes typically show broad emission spectra of 1-2 nm stabilizing and narrowing their wavelength by using external wavelength selective elements is investigated and presented for the first time With the understanding for the novel concept gained in this work a compact ultraviolet laser light source was realized It has a power consumption of less than 10 W and is exceptionally robust due to its immovable components The demonstrated output power of 160 W enables numerous industrial and everyday applications for which previous laser systems have been too complex and overly cost and energy intensive

Computers Helping People with Special Needs Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, 2003-08-02 Success and efficiency are the latest standards and scales of our society Virtual surroundings and communication rooms electronic portals and platforms are pushing us into a new world of personal and professional interaction and cooperation The network to subdue violence is fragile and crumbling tradition is no longer a power of our community What of leisure time dreams and fantasy What of education in the family at school and at university Travelling round the world to develop yourself how man becomes man pleading for a new determination of the idea of education a mission of past centuries inadequate nowadays Regarding September 11th last year the conflicts and confrontations round the globe and events in our direct surroundings these questions seem to be a cry at least to reflect upon what is happening around us and where we all of us still play an active role An International Conference on Computers Helping People with Special Needs is like an island is this a topic at all these days is it worth discussing the area of ICT and the situation of people with disabilities persons who are segregated from developing their personal and professional careers Indeed the biennial meeting has never included these actualities but the basic idea behind ICCHP

starting in 1989 was to focus on these fringe groups and to offer a platform of exchange on all aspects of Human Computer Interaction and the usage of ICT for people with special needs

Computers Helping People with Special Needs

Joachim Klaus, Klaus Miesenberger, Dominique Burger, Wolfgang Zagler, 2011-04-05 The introduction to the 1st International Conference on Computers for Handicapped Persons Vienna 1989 by Amin Tjoa University of Vienna and Roland Wagner

University of Linz finished with the following mission statement on the Future Direction on Computers for Handicapped Persons The different themes show that a lot of problems are solved by the usage of computer technology for helping handicapped persons for instance for the blind and visually handicapped A consequence of the discussed themes there are two directions which should be done in the next years One direction is obvious The tools must be improved and research and development work should be extended to all groups of handicapped even if they are numerically not so large as for

instance the blind or visually handicapped persons On the other side in the area of social implications there is an increasing demand on social science studies on overall computer use among disabled persons Because sources are in principle missing today about disabled persons work tasks research in this field must begin by trying to survey this aspect Particular attention should be paid to the extent and character of computer use among the handicapped in work life There are a lot of questions which should be answered during the next years for reaching the aim of rehabilitation Fifteen years later the 9th International Conference on Computers Helping People with Special Needs Paris 2004 offered a comprehensive and deepened view on general awareness special research and individual applications concerning disabled people and their participation in our society
