Courts,1921 **The Law Times Reports** ,1918 **Intelligent Systems for Science and Information** Liming Chen,Supriya Kapoor,Rahul Bhatia,2014-01-25 The book Intelligent Systems for Science and Information is the remarkable collection of extended chapters from the selected papers that were published in the proceedings of Science and Information SAI Conference 2013 It contains twenty four chapters in the field of Intelligent Systems which received highly recommended feedback during SAI Conference 2013 review process All chapters have gone through substantial extension and consolidation and were subject to another round of rigorous review and additional modification These chapters represent the state of the art of the cutting edge research and technologies in related areas and can help inform relevant research communities and individuals of the future development in Science and Information *Collision Avoidance and Resolution Multiple Access* Rodrigo Garcés,1999 Multiple access interference constitutes a major cause of throughput degradation in wireless networks The focus of this thesis is the design and analysis of medium access control protocols that mitigate multiple access interference by resolving collisions of small control packets used to avoid the collision of much larger data packets An upper bound on the average cost of resolving collisions using a deterministic tree splitting algorithm is derived This bound is then applied to the compute the average channel utilization in a fully connected network with a large number of stations Under light load conditions collision avoidance and resolution CARMA protocols achieve the same average throughput as floor acquisition multiple access FAMA protocols It is also shown that as the arrival rate of RTSs increases the throughput achieved by CARMA protocols is close to the maximum throughput that any FAMA protocol can achieve when propagation delays and the control packets used to acquire the floor are much smaller than the data packet trains sent by stations The Law Times Reports of Cases Decided in the House of Lords, the Privy Council, the Court of Appeal ... [new Series]. ,1918 **Cyberspace Safety and Security** Yang Xiang,Javier Lopez,C.-C. Jay Kuo,Wanlei Zhou,2012-12-02 This book constitutes the refereed proceedings of the 4th International Symposium on Cyberspace Safety and Security CSS 2012 held in Melbourne Australia in December 2012 The 30 revised full papers presented together with 7 invited talks were carefully reviewed and selected from 105 submissions The papers cover the following topics mobile security cyberspace attacks and defense security application adn systems network and cloud security wireless security security protocols and models *Fairplay* ,1973 Conference on the Biological Aspects of the Bird/Aircraft Collision Problem Sidney A. Gauthreaux,1974 **Laser and Coherence Spectroscopy** Jeffrey Steinfeld,2013-03-08 The impact which has been made on spectroscopy by lasers and by this route on major segments of physics and chemistry has received ample documen tation in the past several years Two principal themes emerge from examina tion of the numerous books and monographs now available on this subject first an increase in spectral resolution to levels previously undreamed of and second the generation of nonlinear phenomena as a result of the intense radiation fields

available from laser devices There is one additional property of laser radiation which although used extensively in experiments does not appear to have been as thoroughly reviewed as the foregoing aspects This is the spatial and temporal coherence of the radiation field produced by the laser which makes possible the coherent excitation of molecular energy states This feature is the subject of the present volume While the use of coherence methods in spectroscopy has been paced by lasers it is by no means restricted to this technology In the second and fourth chapters microwave sources are discussed as generators of coherent radiation fields and are used to probe both rotational energy levels and spin states of electronically excited molecules The phenomena discussed in this book such as nutation free induction decay radiative echoes rapid passage and so forth are really the same in different regions of the spectrum and themselves echo from one chapter to the next
