Blue Skies Over Beijing Matthew E. Kahn, Siqi Zheng, 2019-07-16 How individuals and the government are changing life in China's polluted cities Over the past thirty years even as China's economy has grown by leaps and bounds the environmental quality of its urban centers has precipitously declined due to heavy industrial output and coal consumption The country is currently the world's largest greenhouse gas emitter and several of the most polluted cities in the world are in China Yet millions of people continue moving to its cities seeking opportunities *Blue Skies over Beijing* investigates the ways that China's urban development impacts local and global environmental challenges Focusing on day to day choices made by the nation's citizens families and government Matthew Kahn and Siqi Zheng examine how Chinese urbanites are increasingly demanding cleaner living conditions and consider where China might be headed in terms of sustainable urban growth Kahn and Zheng delve into life in China's cities from the personal perspectives of the rich middle class and poor and how they cope with the stresses of pollution Urban parents in China have a strong desire to protect their children from environmental risk and calls for a better quality of life from the rising middle class places pressure on government officials to support greener policies Using the historical evolution of American cities as a comparison the authors predict that as China's economy moves away from heavy manufacturing toward cleaner sectors many of China's cities should experience environmental progress in upcoming decades Looking at pressing economic and environmental issues in urban China *Blue Skies over Beijing* shows that a cleaner China will mean more social stability for the nation and the world

Entrepreneurship, Community, and Community Development Michael W-P Fortunato, Theodore R. Alter, 2017-08-09 While entrepreneurship is widely cited as playing a key role in economic development job creation and advances in well being in capitalist nations there has been an overwhelming focus on the firm firm founders and founders strategies and decision making processes Only more recently the important link between communities and entrepreneurs has emerged as a new frontier in entrepreneurship research This book brings the emerging nexus between community and entrepreneur to light by exploring the mutual impact that communities and entrepreneurs have on one another It focuses on how entrepreneurship development can push beyond the traditional emphasis on economic growth from enriching the local lifestyle to building self sufficiency from attracting new markets to rediscovering traditional work from the highest tech enterprises to the most ancient crafts and trades The authors cover a wide variety of topics including rural community entrepreneurship development and culture innovation and regional development community based enterprise learning and urban revitalization strategies This book was originally published as a special issue of the journal *Community Development*

Air Pollution and Climate Change Grzegorz Peszko, Markus Amann, Yewande Awe, Gary Kleiman, Tamer Samah Rabie, 2023-02-21 While many countries pledge to phase out fossil fuels in 30 40 years 6 7 million people die each year from air pollution This report shows how to design coherent policies that harness synergies and manage tensions between air quality and climate mitigation and that put people's health first while

paving the way for long term decarbonization *Macroeconomics After the Financial Crisis* Mogens Ove Madsen, Finn Olesen, 2016-04-14 How should Europe cope with the negative and still unfolding economic consequences of the current economic crisis And why does Europe seem to be more conservative than the USA in dealing with the crisis Since the outbreak of the current international economic crisis in 2008 the USA and many of the European countries have been tormented by high levels of unemployment and low levels of inflation interest rates close to zero and fiscal policies of austerity As such the modern economic mainstream has been challenged by these empirical facts Today several years after the outbreak of the international economic crisis supply side effects do not seem to be increasing employment as the modern mainstream claimed they would Aggregate demand has to play a more important role in macroeconomic analysis than hitherto That is there is a need for alternative explanations of how a modern macro economy is expected to function and how the macroeconomic outcome could be manipulated by the right economic policy proposals As expressed by the contents of the present book a Post Keynesian understanding proposes such an alternative theoretically methodologically and in terms of policy measures This book will present new materials and approaches especially new evidence and new views on the potential problems of public debt the European Union and the present crisis Central Banking hysteresis in an agent based framework the foundations of macroeconomics and the problems of uncertainty Neoliberalism 2.0: Regulating and Financing Globalizing Markets L. Nijs, 2016-01-26 In today s increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2 0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2 0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state The Inequality Paradox Douglas McWilliams, 2018-10-09 In his illuminating new book Douglas McWilliams argues that inequality is largely driven not by a conspiracy of the rich as Thomas Piketty suggests but by technology and globalization tat have led to the paradox of rising inequality even as worldwide poverty drops But what are the implications of this seeming contradiction and what ultimately drives the global distribution of wealth What can societies do to reshape capitalism for the 21st century Drawing

on the latest research McWilliams investigates how wealth is concentrated and why it persistently remains in the hands of very few In accessible and thought provoking prose McWilliams poses a comprehensive theory on why capitalism has not met its match in the form of increasingly disparate income distribution but warns of the coming wave of technological development the fourth industrial revolution that threatens to create a scarcity of unskilled jobs that will lead to even greater inequality and explains what governments can do to prepare for this From the inquisitive layperson to the professional economist or policymaker The Inequality Paradox is essential reading for understanding the global economy in its present state McWilliams is a fresh authoritative voice entering the global discussion making this book indispensable in preparing for the imminent economic challenges of our changing world

Atlas of Finance Dariusz Wojcik, Panagiotis Iliopoulos, Stefanos Ioannou, Liam Keenan, Julien Migozzi, Timothy Monteath, Vladimir Pazitka, Morag Torrance, Michael Urban, 2024-09-10 A unique illustrated exploration of the development of finance that combines data from every part of the world and covers five thousand years of history From the emergence of money in the ancient world to today's interconnected landscape of high frequency trading and cryptocurrency the story of finance has always taken place on an international stage Finance is one of the most globalized and networked of human activities and one of the most important social technologies ever invented This volume the first visually based book dedicated to finance uses graphics and maps to bring the complex and abstract world of finance down to earth showing how geography is fundamental for understanding finance and vice versa It illuminates the people including Adam Smith Karl Marx and John Maynard Keynes who have shaped our thinking about global finance brings to life the ways that place specific histories laws regulations and institutions influence finance shows how finance relates to innovation globalization and environmental change and details how finance plays a key part in drawing the landscape of uneven development inequality and instability The Atlas of Finance with word and image will change the way you view both your money and your world
