 quickly      **Python Django Web Development** Willian Jordon, 2019-08-25 The need for web apps has been on the rise  
 However most languages that support web development do not provide an easy means by which to implement the modern  
 need for web apps This means that developers spend longer periods of time developing these apps Django is a Python  
 framework that provides web developers with a mechanism to develop web apps in a quick and easy manner Therefore you  
 need to know how to use the Python framework This book explores this in detail Make sure that you install Python Python 2.6  
 5 or higher Enjoy reading Django allows developers to build websites that are deep and dynamic in a very short time It takes  
 the hard work out of developing leaving users to focus on the fun and taking away the repetitive parts of the job Because of

this Django can provide high level abstractions of the most common patterns in web development shortcuts for programming jobs done frequently and very clear conventions on solving problems While providing all this Django does its best not to get in the way leaving you to do as much work outside the framework scope as you want Django is about making web development fun and easy Over the course of this section we will look at the basics of installing and using the framework
