Army Techniques Publication Atp 3-90.90 Army Tactical Standard Operating Procedures November 2011 United States Government US Army, US Army, 2012-09-10

Army Techniques Publication ATP 3 90 90 facilitates development of standard operating procedures (SOPs) in order to enhance efficiency and adaptability across the force. ATP 3 90 90 achieves this purpose through linking to a milWiki portal under the milSuite uniform resource locator (URL) containing guidance for tactical SOPs and unclassified examples of SOPs for reference. The SOP portal provides a baseline for developing new SOPs quickly and a forum for improving existing SOPs. The portal presents best practices consistent with doctrinal principles. Soldiers developing SOPs for their units are encouraged to apply critical thinking while referring to the models and other resources to aid their own content development. At a minimum, portal users must be familiar with this ATP. Field Manuals (FMs) 5 0 and 6 99 2, Army Regulations (ARs) 25 1 34 4 and 380 5, and Department of the Army Pamphlet (DA Pam) 25 403. Soldiers are encouraged to use the portal to collaborate to improve the portal's contents and to upload new SOP examples. The SOP portal is secure and requires an Army Knowledge Online or Defense Knowledge Online login. The portal's contents are unclassified. Neither this manual nor the SOP portal is intended to regulate the appearance or content of unit SOPs.

Note: In June 2010, JP 3 31 changed standing operating procedure to standard operating procedure. The meaning is unchanged. The doctrine in this manual provides techniques for developing unit tactical SOPs. Units throughout the Army can take advantage of technology to obtain guidance, collaborate in real time, and find information quickly. This manual and the SOP portal are intended to enhance operational adaptability Army wide. In the short

term the information in the SOP portal will help units establish or improve SOPs more rapidly In the long term the intention is that more and more units will build SOPs using the portal and the doctrine in this manual Ideally SOPs throughout the Army should increase in similarity as the combination of doctrinal guidance and Army wide milWiki collaboration facilitates consensus This will help units communicate and coordinate with one another more easily Reassigned Soldiers and units will become familiar with SOPs in their new assignments more quickly Chapter 1 of this ATP discusses resources for integrating SOP development with collaborative technology doctrine and policy Chapter 2 discusses a process to help authors develop effective SOPs Chapter 3 provides the SOP portal s URL and detailed instructions on how to use the portal To enhance standardization of tactical SOPs the SOP portal provides tactical SOP guidance organized according to the Army operation plan and order format For the reader s convenience chapter 3 of this manual shows a list of attachments and responsible staff officers as table 3 1 pages 3 4 to 3 7 Table 3 1 serves as an approximate table of contents for the information under the portal s tactical SOP guidance tab Because the volume and variability of material in the portal providing a fixed listing of the portal s contents in this ATP is not practical Unit SOP examples are organized under the portal s categories tab described in chapter 3 The general categories used for SOP examples are nondoctrinal and variable they will expand or change as Soldiers modify them

operations which lend themselves to a definite or standardized procedure without loss of effectiveness. The procedure is applicable unless ordered otherwise. JP 3 31 A SOP is both standing and standard; it instructs how to perform a prescribed and accepted process established for completing a task. Features of operations that lend themselves to standardization are common and usually detailed processes performed often and requiring minimal variation each time. Well written and properly used unit tactical SOPs enhance effective execution of tasks; the benefits of SOPs are numerous. They reduce training time, the loss of unwritten information, the commission of errors, the omission of essential steps or processes, and the time required for completion of tasks. This does not mean, however, that carrying out SOPs never requires thought or that SOPs should never change. Indeed, tactical units must change some operating procedures as rapidly as operational environments and missions change. The SOP portal helps units avoid an unnecessary loss of effectiveness that could occur by maintaining unthinking dependence on outdated written procedures. The portal also helps units avoid a loss of effectiveness that could occur when units delay writing down processes that need to become standardized. The doctrine in this manual provides techniques for developing unit tactical SOPs. Units throughout the Army can take advantage of technology to obtain guidance, collaborate in real time, and find information quickly. This manual and the SOP portal are intended to enhance operational adaptability Army wide. In the short term, the information in the SOP portal will help units establish or improve SOPs more rapidly. In the long term, the intention is that more and more units will build SOPs using the portal and the doctrine in this manual. SOPs throughout the Army should increase in similarity as the combination of doctrinal guidance and Army wide milWiki collaboration facilitates consensus.

Handbook of Systems Engineering and Risk Management in Control Systems, Communication, Space Technology, Missile, Security and Defense Operations Anna M. Doro-on, 2022-09-27. This book provides multifaceted components and full practical perspectives of systems engineering and risk management in security and defense operations with a focus on infrastructure and manpower control systems, missile design, space technology, satellites, intercontinental ballistic missiles, and space security. While there are many existing selections of systems engineering and risk management textbooks, there is no existing work that connects systems engineering and risk management concepts to solidify its usability in the entire security and defense actions. With this book, Dr. Anna M. Doro-on rectifies the current imbalance. She provides a comprehensive overview of systems engineering and risk management before moving to deeper practical engineering principles integrated with newly developed concepts and examples based on industry and government methodologies. The chapters also cover related points including design principles for defeating and deactivating improvised explosive devices and land mines, and security measures against kinds of threats. The book is designed for systems engineers in practice, political risk professionals, managers, policy makers, engineers in other engineering fields, scientists, decision makers in industry and government, and to serve as a reference work in systems engineering and risk management courses with focus on security and defense operations.
