 ecosystems societies traffic financial markets opinion formation and spreading or the internet and social media Complex
 systems are systems composed of many elements that interact strongly with each other which makes them extremely rich
 dynamical systems showing a huge range of phenomena Properties of complex systems that are of particular importance are
 their efficiency robustness resilience and proneness to collapse The quantitative tools and concepts needed to understand the
 co evolutionary nature of networked systems and their properties are challenging The book gives a self contained
 introduction to these concepts so that the reader will be equipped with a toolset that allows them to engage in the science of
 complex systems Topics covered include random processes of path dependent processes co evolutionary dynamics dynamics
 of networks the theory of scaling and approaches from statistical mechanics and information theory The book extends beyond
