Computer Aided Seismic and Fire Retrofitting Analysis of Existing High Rise Reinforced Concrete Buildings

Raja Rizwan Hussain, Muhammad Wasim, Saeed Hasan, 2015-08-13 This book details the analysis and design of high rise buildings for gravity and seismic analysis. It provides the knowledge structural engineers need to retrofit existing structures in order to meet safety requirements and better prevent potential damage from such disasters as earthquakes and fires. Coverage includes actual case studies of existing buildings, reviews of current knowledge for damages and their mitigation, protective design technologies, and analytical and computational techniques. This monograph also provides an experimental investigation on the properties of fiber reinforced concrete that consists of natural fibres like coconut coir and also steel fibres that are used for comparison in both Normal Strength Concrete (NSC) and High Strength Concrete (HSC). In addition, the authors examine the use of various repair techniques for damaged high rise buildings. The book will help upcoming structural design engineers learn the computer aided analysis and design of real existing high rise buildings by using ACI code for application of the gravity loads, UBC 97 for seismic analysis, and retrofitting analysis by computer models. It will be of immense use to the student community, academicians, consultants, and practicing professional engineers and scientists involved in the planning, design, execution, inspection, and supervision for the proper retrofitting of buildings. *Fifth U.S.*

National Conference on Earthquake Engineering, July 10-14, 1994, Chicago, Illinois, 1994 Cases on Performance Measurement and Productivity Improvement: Technology Integration and Maturity Khosrow-Pour, Mehdi, 2012-08-31 One of the main aspects of an organization is the efficiency of managerial concerns, daily interactions, and the design and implementation of its business system. Therefore, integrating the latest technology is vital in assisting in the performance and productivity improvement of an organization. Cases on Performance Measurement and Productivity Improvement: Technology Integration and Maturity highlights the successes and failures which have shaped the modern business, as well as the technological solutions taken to improve the organizational system. Providing essential research on these applied innovations, this collection of case studies appeals to both academics and practitioners in the business and IT management fields.

Earthquake Resistant Engineering Structures X C.A. Brebbia, 2015-09-15 Containing the latest research on preparation for and mitigation of future earthquakes, this book addresses an area of increasing importance to many areas around the world. It contains research presented at the ninth and latest in a series of biennial conferences on the topic, organised by the Wessex Institute. As world population has concentrated in urban areas, we have seen the consequences of natural disasters take an ever higher toll in human life and property. Adding to this trend, earthquake activity is being registered in areas that were not previously very active, thus the need for research into the application of technological advances to the specific area of earthquake engineering. This volume presents those advances. The papers cover Seismic Isolation and Energy Dissipation, Building Performance During Earthquakes, Nonlinear Numerical Analysis, Performance Based Design, Experimental Studies.
