

- The cardiovascular system includes:
 - The heart, a muscular pump
 - The blood, a fluid connective tissue
 - The blood vessels, arteries, veins and capillaries
- Blood flows away from the heart in arteries, to the capillaries and back to the heart in the veins
- There is a decrease in blood pressure as the blood travels away from the heart
- Arterial branches of the aorta supply oxygenated blood to all parts of the body
- Deoxygenated blood leaves the organs in the veins
- Veins unite to form the vena cava which returns the blood to the heart

Pulmonary System

- This is the route by which blood is circulated from the heart to the lungs and back to the heart again
- The pulmonary system is exceptional in that the pulmonary artery carries deoxygenated blood and the pulmonary vein carries oxygenated blood
