

## Career Autobiography

Describe the jobs you have held in your professional career for the past 15 years. In your description, please include the following:

- The priorities which led you to take each job and why you stayed
- Your primary responsibilities
- The biggest challenge you faced
- Your biggest contribution and each position's biggest contribution to you
- Aspect(s) of each position you enjoyed experiencing the most
- Aspect(s) of each position you would avoid going forward
- Reasons for leaving previous positions

Please provide for us a personal statement where you offer for us your own reference letter or testimonial. Please feel free to elaborate and embellish as you wish and include:

- What do you believe your strongest talents, skills, and abilities to be as a professional?
- What are the three values that drive your life as a person?
- What you believe to be your unique gift is to your profession?
- Give an example of how your proactive or anticipatory focus "saved the day" for someone.

Is there anything about you which would be interesting for us to know that we don't already know?

**Career Directioning** Glenn A. Druhot, 2007-08-27 CAREER DIRECTIONING Career Directioning is a method of seeking your perfect job based upon your values abilities and personality not just another job The purpose of this book is to assist you in discovering the best right career for you If you are searching for a more satisfying career have been downsized feel as though by changing jobs you will increase your earning power or you are starting your first job search the techniques in this book will help This book is designed in a workbook format to assist you in your career management You will find that each chapter builds on the previous chapter The book begins by describing the emotional stages that we go through whenever there is a job loss Then it proceeds to describe the ways to discover your perfect job Its truly amazing how many of us lose sight of what we once were planning on doing with our career or worse yet have difficulty in describing what our ideal job would look like I have spent my career listening to people say how dissatisfied they were with their jobs and careers When I ask them what their passion is they often cannot answer what that could be Do you know what your passion is for an occupation Are you living the life that you want Are you employed in a position that is unfulfilling Are you looking for a career change Have you been a victim of downsizing It has been said that the only true success in life is to have lived life in your own way What would life be like if you lived your life in your own way When was the last time that you thought about it Did you have a dream like most of us as you were growing up to be or to do something and life got in the way Wouldnt it be wonderful if you could get up tomorrow and go to work in a position where you would feel as though you are contributing something to the organization Or being employed where you are appreciated for what you do Or better yet work in a position that you know you are making a difference Life is too short to spend time in a career that is not fulfilling Too many people ask themselves what kind of job or career would be best for them Why is it that we focus on the what rather than the how Well it is possible but you must make it happen You cant wait for employers to come to you You have to take charge of the direction of your career direction yourself What is your rationale for reading this book Could it be one of the following You are searching for a more satisfying career You have been downsized from a job You are starting your first job search Feelings like your opportunities for growth are limited where you are presently There is a basic conflict of values on the job You are a Baby Boomer and are now seeking a career that you hope will be more satisfying than what you have done so far in life There has been a significant life event that is propelling you to make a career change It could be something like a near death experience divorce turning 40 or 50 or physically unable to do the job that you have done in the past You feel as though by changing jobs you will increase your earning power You would like to pursue a dream or complete a mission Maybe you were fired or laid off and need to make a career change You have retired and now are seeking a rewarding career that you would enjoy more You have climbed the corporate ladder and your priorities have changed Often we allow corporations or organizations to manage our careers In my private career coaching practice I have helped literally thousands of individuals

who have allowed corporations to totally control their lives and when they have been job eliminated or the company is acquired by another public traded corporation they find themselves searching for a new direction with their career I feel privileged like other ca

web instruction solving exponential equations without logarithms this lecture uses a four step process to solve exponential equations 1 isolate the base 2 write both sides of the equation as exponential expressions with like bases 3 set the exponents equal to each other 4 solve for the unknown

*4 7 exponential and logarithmic equations mathematics - Nov 06 2022*

web we have already seen that every logarithmic equation  $\log_b x = y$  is equivalent to the exponential equation  $b^y = x$  we can use this fact along with the rules of logarithms to solve logarithmic equations where the argument is an algebraic expression for example consider the equation  $\log_2 2 \log_2 3x = 5$

**algebra 2 exponential and logarithmic functions worksheets** - Jun 13 2023

web exponential equations not requiring logarithms this algebra 2 exponential equations not requiring logarithms worksheet will give you exponential equations to solve you can choose the number of problems you want and the form of the problems

**exponential equations not requiring logarithms** - Jan 08 2023

web use like bases to solve exponential equations use logarithms to solve exponential equations use the definition of a logarithm to solve logarithmic equations use the one to one property of logarithms to solve logarithmic equations solve applied problems involving exponential and logarithmic equations

7 5 solve exponential and logarithmic equations - Jul 02 2022

web example pageindex 4 solve exponential equations using logarithms solve  $5 \times 11$  find the exact answer and then approximate it to three decimal places solution  $5 \times 11$  since the exponential is isolated take the logarithm of both sides  $\log 5 \times \log 11$  use the power property to get the  $x$  as a factor not an exponent

solving exponential equations without logarithms - Aug 15 2023

web an exponential equation involves an unknown varying in the expander in this lessons we will focus on the exponential equations that do not require the use of logarithm in algebra those topic is also known as solving exponential equations to an same base wherefore the reason is ensure are can solve the equation by forcing both sides of

lesson 7 2 exponential equations not requiring logarithms - May 12 2023

web mar 25 2014 how to solve basic exponential equations that do not involve logarithms but can rather be rewritten so everything is in the same base

**solving exponential equations using logarithms chilimath** - Apr 30 2022

web 1 keep the exponential expression by itself on one side of the equation 2 get the logarithms of both sides of the equation you can use any bases for logs 3 solve for the variable keep the answer exact or give decimal approximations

**solving exponential equations using exponent properties khan academy** - Dec 07 2022

web voiceover let s get some practice solving some exponential equations and we have one right over here we have  $26$  to the  $9x$  plus five power equals one so pause the video and see if you can tell me what  $x$  is going to be well the key here is to

realize that  $26$  to the zeroth power to the zeroth power is equal to one

*8 6 properties of logarithms solving exponential equations* - Feb 26 2022

web in general terms the main strategy for solving exponential equations is to 1 first isolate the exponential then 2 apply a logarithmic function to both sides and then 3 use property c we ll illustrate the strategy with several examples
