

# Haters

Never mind what haters say  
Ignore them till they fade away  
Even if they criticize you in any way  
Pay no attention to them any single day  
As the sun shines, just continue making your hay

Whatever against you they conspire  
Spare them no time as you go higher  
They mock you when you are stuck in the mire  
Let that be an up-beat that inspire  
Making you to see something special in everything you desire

When you walk by, they pose and stare  
With evil eyes prompting to set you a snare  
Make brisk steps to show them that you don't care  
For they spin invisible webs everywhere  
But make them feel angered beyond repair

When you see that jealousy on their face, wave hello  
Or play them melody of cello  
To tell them that they make you become mellow  
When they try to scare, tell them you are not yellow

Walk over them with pride  
As they spice your ride  
Make for them an extra stride  
Shun them and their views just deride  
And in your life, let them outride

## Careers For Science Haters Poems Hatin:

*Loving and Hating Mathematics* Reuben Hersh, Vera John-Steiner, 2010-12-13 An exploration of the hidden human emotional and social dimensions of mathematics Mathematics is often thought of as the coldest expression of pure reason But few subjects provoke hotter emotions and inspire more love and hatred than mathematics And although math is frequently idealized as floating above the messiness of human life its story is nothing if not human often it is all too human *Loving and Hating Mathematics* is about the hidden human emotional and social forces that shape mathematics and affect the experiences of students and mathematicians Written in a lively accessible style and filled with gripping stories and anecdotes *Loving and Hating Mathematics* brings home the intense pleasures and pains of mathematical life These stories challenge many myths including the notions that mathematics is a solitary pursuit and a young man's game the belief that mathematicians are emotionally different from other people and even the idea that to be a great mathematician it helps to be a little bit crazy Reuben Hersh and Vera John Steiner tell stories of lives in math from their very beginnings through old age including accounts of teaching and mentoring friendships and rivalries love affairs and marriages and the experiences of women and minorities in a field that has traditionally been unfriendly to both Included here are also stories of people for whom mathematics has been an immense solace during times of crisis war and even imprisonment as well as of those rare individuals driven to insanity and even murder by an obsession with math This is a book for anyone who wants to understand why the most rational of human endeavors is at the same time one of the most emotional
