,2000-04 Executive Function and Education Mariëtte Huizinga,Dieter Baeyens,Jacob A. Burack,2018-09-21 Executive
function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions
These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of
behavior to the changing demands of the environment The development of executive function relies on the maturation of
associated brain regions as well as on stimulation in the child s social contexts especially the home and school Over the past
decade the term executive function has become a buzzword in the field of education as both researchers and educators
underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating
this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that
both facilitates communication among researchers from diverse fields and provides a theoretically sound source of
information for educators The contributors to this volume who hail from several different countries in Europe and North
America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among
various executive function components and educational success The Politics and Governance of Basic Education Brian
