   Android for Programmers Paul J. Deitel,2012 By the world s 1 Java programming authors and the creators of the bestselling iPhone for Programmers the application driven approach to Android brings the Deitels signature Live Code technique to Android development and teaches every new technique in the context of a real world Android App 16 complete Apps in all   **Development of a mobile application for carpooling the elderly** Mohamed Lamine Fetni,2020-03-27 Bachelor Thesis from the year 2019 in the subject Computer Science Applied language English abstract This thesis proposes a platform to help improve elder s mobility through carpooling a way for car drivers to share their private vehicle with more elders in order to splitting and reducing costs Carpooling may be one of the best solutions when there is no other mean of transportation to a specific location but naturally it is not the only one Mobile applications take more and more part of everyone s lives different services for carpooling with different features begin to compete with existing transportation solutions Some people start to prefer using new carpooling services over the traditional services represented by taxi services GoRide aims to promote carpooling by targeting elders making it easier for them to adhere and use this system In general people have a hard time conciliating their schedules because of the way they move from one location to another And elders suffer from this the most especially here in Algeria since transportation between cities is not that great As students we think there should exist more suitable transportation solutions to places where transportation networks are short and cheap and helpful for elders By targeting elders people will more likely join the service since its users are primarily other people form the same environment To put the carpooling system in place we have designed and developed an Android mobile application with backend servers for users to access the carpooling service through their smartphones additionally the application involves some features that are critical to the service By using Android Development Tools and Libraries and efficient backend solutions we have managed to make the application simple but powerful as well which makes this application very useful for the young and the old to use Our app GoRide will be a unique carpooling application that would take benefits of the advantages of carpooling and try to improve and eliminate the disadvantages all while focusing on making it a good

carpooling experience for elders The realization of our project will go through the conceptual phase and then development phase Since making a good application requires good planning first   Transportation and Information Piyushimita (Vonu) Thakuriah,D. Glenn Geers,2013-06-18 Transformations in wireless connectivity and location aware technologies hold the promise of bringing a sea change in the way transportation information is generated and used in the future Sensors in the transportation system when integrated with those in other sectors for example energy utility and health have the potential to foster novel new ways of improving livability and sustainability The end result of these developments has been somewhat contradictory Although automation in the transportation environment has become increasingly widespread the level of involvement and active participation by people in terms of co creation and contribution of information has also increased As a result the following two major trends have been observed 1 increases in Machine to Machine M2M communications and 2 increases in the variety and volume of User Generated Content In this transportation paradigm the pervasive use of Information and Communication Technologies will serve as the foundation for mobility intelligence towards an ubiquitous information centered mobility environment However many technical and operational questions as well as social management and legal challenges present themselves in the transformation to this vision The book presents a non technical review of research and initiatives and a discussion of such opportunities and challenges   Kiplinger's Personal Finance ,2010
