J. MAY,2020-05-26 Learning sight words is one of the most important things to master as new reader Sight words are those

that appear with great frequency in text. Many of these words do not follow phonic rules. Therefore, children must automatically recognize them. Children who learn sight words and apply them to their reading succeed in becoming strong and confident readers. With this in mind, it is important to practice using these sight words in different ways. One of the most effective ways is to use them while reading. Your child must master sight words to become an independent, successful reader. Each page of the Sight Word for kindergarten packets focuses on the following activities: Trace it: Students will be able to trace the specified sight word two times using proper letter formation. This will also help them practice good penmanship. Write it: This will also help practice spelling and recognize the word. Color it: The color it portion helps students read and recognize color words while coloring the sight word according to the color code. Find and Circle it: Students find the specified sight word within a group of different words with a variety of fonts. Cut and Paste to finish the sentence: At the bottom of the page, there are mixed-up letter tiles to build the sight word. Students will cut and paste these letters to correctly build the given sight word. Highlight it: Grab the highlighters or crayons and let students find the specified sight word in a group of sight words. Connect the dot: Follow the sight word, then the student will color the picture. Complete missing word: Put it in a sentence. There are three simple sentences where students will write the sight word and read the sentence with the sight word. All of the sentences are designed with beginning readers in mind and mostly include sight words. **100**
